Distributions may be paid out of capital. Distributions on any Units (whether traded in HKD or USD counter) will be in RMB only.
Financial year end of the Sub-Fund:	31 March
ETF Website #:	www.am.miraeasset.com.hk/globalx

* The ongoing charges figure represents the expenses charged based on the annual audited financial statement for the financial year ended 31 March 2020, expressed as a percentage of the Sub-Fund's average net asset value over the same period. This figure may vary from year to year.

^ This is an estimated annual tracking difference. Investors should refer to the Sub-Fund's website for more up-to-date information on the actual tracking difference.

This website has not been reviewed or approved by the SFC.

What is this product?

- Global X China Biotech ETF ("Sub-Fund") is an investment fund of the Global X ETF Series, which is an umbrella unit trust established under Hong Kong law. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds ("Code"). The units of the Sub-Fund ("Units") are traded on The Stock Exchange of Hong Kong Limited ("SEHK") like stocks.
- The Sub-Fund is denominated in RMB. Creations and redemptions are in RMB only.

Objective and investment strategy

Objective

The Sub-Fund seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Solactive China Biotech Index NTR (“Underlying Index”).

Strategy

The Manager intends to adopt a full replication strategy through investing all, or substantially all, of the assets of the Sub-Fund directly in all securities constituting the Underlying Index in substantially the same weightings as these securities have in the Underlying Index to achieve the investment objective of the Sub-Fund (“Replication Strategy”).

Where the adoption of a Replication Strategy is not efficient or practicable or where the Manager considers appropriate in its absolute discretion, the Manager may pursue a representative sampling strategy and hold a representative sample of the constituent securities of the Underlying Index selected by the Manager using quantitative analytical models to derive a portfolio sample (“Representative Sampling Strategy”). Investors should note that the Manager may switch between the Replication Strategy and the Representative Sampling Strategy without prior notice to investors, in its absolute discretion.

In relation to the Sub-Fund’s investments in A-Shares, the Manager will invest via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively, “Stock Connect”).

Currently, the Sub-Fund has no intention to use any financial derivative instruments for investment purposes, but may use financial derivative instruments for hedging purposes only. In addition, the Sub-Fund will not enter into sale and repurchase transactions, reverse repurchase transactions or other similar over-the-counter transactions. Should there be a change in such intention, the Manager will seek prior approval of the SFC if required and not less than one month’s prior notice (or such other notice period as agreed with the SFC) will be given to unitholders.

The Manager may, on behalf of the Sub-Fund, enter into securities lending transactions with a maximum level of up to 25% and expected level of approximately 20% of its net asset value and is able to recall the securities lent out at any time.

As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the value of the securities lent (interests, dividends and other eventual rights included) valued on a daily basis. The collateral will be subject to safekeeping by the Trustee or an agent appointed by the Trustee. Non-cash collateral received may not be sold, re-invested or pledged. Any re-investment of cash collateral received shall be subject to the requirements as set out in the Code. To the extent the Sub-Fund undertakes securities lending transactions, all revenues (net of direct and indirect expenses as reasonable and normal compensation for the services rendered by the Manager, a securities lending agent and/or other service providers in the context of such transactions to the extent permitted by applicable legal and regulatory requirements) shall be returned to the Sub-Fund.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Part 1 of the Prospectus.

Underlying Index

The Underlying Index is a net total return, free float market capitalisation weighted index that provides exposure to Chinese companies that are mainly active in the field of biotechnology. A net total return index reflects the reinvestment of dividends or coupon payments, after deduction of any withholding tax (including any surcharges for special levies, if applicable).

The Underlying Index comprises of companies headquartered in the PRC or Hong Kong and listed on one of the following exchanges and should have listing history of at least 6 months: (i) the SEHK in Hong Kong, (ii) the Shanghai Stock Exchange (“SSE”) or Shenzhen Stock Exchange (“SZSE”) in the PRC; or (iii) the New York Stock Exchange or NASDAQ Stock Market in the United States. In addition, the companies must be from one of these industries according to the FactSet Industries and Economic Sectors: (a) Biotechnology; (b) Pharmaceuticals: Other; (c) Pharmaceuticals: Major; or (d) Pharmaceuticals: Generic. The companies must also have average daily value traded of at least HKD 20 million over six months prior to and including the selection day of the constituent securities of the Underlying Index.

The Underlying Index is compiled and managed by Solactive AG (“Underlying Index Provider”) and was launched on

18 April 2019. The Underlying Index is denominated in RMB. The Manager (and each of its connected persons) are independent of the Underlying Index Provider.

As at 30 June 2020, the Underlying Index comprised 20 constituent stocks with total market capitalisation of approximately RMB2.083 trillion.

Details of the index methodology of the Underlying Index can be found on www.solactive.com (the website has not been reviewed or approved by the SFC). The list of constituents and their respective weightings can be found on www.solactive.com (the website has not been reviewed or approved by the SFC).

The Underlying Index is distributed under the following identifiers:

Name	ISIN	WKN	Reuters	Bloomberg
Solactive China Biotech Index NTR	DE000SLA7273	SLA727	.SOLCBTN	SOLCBTN Index

Use of derivatives / Investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's net asset value.

What are the key risks?

Investment involves risks. You may suffer substantial / total loss by investing in this Sub-Fund. Please refer to the Prospectus for details including the risk factors.

1. General investment risk

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Equity market risk

- The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

3. Risks associated with biotech companies

- Biotech companies invest heavily in research and development which may not necessarily lead to commercially successful products, and the ability for biotech companies to obtain regulatory approval (for example, product approval) may be long and costly. In addition, the prospects of biotech companies may significantly be impacted by technological changes, increased governmental regulations and intense competition from competitors.
- Many biotech companies are also dependent upon the ability to use and enforce intellectual property rights and patents, and any such impairment may have adverse financial consequences.
- All these may have impact on the business and/or profitability of the biotech companies in which the Sub-Fund invests and therefore may adversely affect the net asset value of the Sub-Fund.

4. Risk associated with high volatility of the market in the PRC

- High market volatility and potential settlement difficulties in the PRC markets may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may adversely affect the value of the Sub-Fund.

5. Currency risk

- The base currency and the underlying investments of the Sub-Fund are denominated in RMB, but the trading currencies of the Sub-Fund are in HKD and USD. The net asset value of the Sub-Fund and its performance may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

6. Emerging market risk

- The PRC is an emerging market. The Sub-Fund invests in PRC companies which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks / control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.

- 7. Risk associated with regulatory or exchanges requirements of the equity market in the PRC**
- Securities exchanges in the PRC markets typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.
- 8. RMB currency and conversion risks**
- RMB is currently not freely convertible and is subject to exchange controls and restrictions.
 - Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund.
 - Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
 - Under exceptional circumstances, payment of redemptions and/or distribution payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.
- 9. RMB distributions risk**
- Investors should note that where a unitholder holds Units traded under the HKD or USD counter, the relevant unitholder will only receive distributions in RMB and not HKD or USD. In the event the relevant unitholder has no RMB account, the unitholder may have to bear the fees and charges associated with the conversion of such distribution from RMB into HKD, USD or any other currency. Unitholders are advised to check with their brokers concerning arrangements for distributions.
- 10. Securities lending transactions risk**
- The borrower may fail to return the securities in a timely manner or at all. The Sub-Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
 - As part of the securities lending transactions, the Sub-Fund must receive cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Sub-Fund.
 - By undertaking securities lending transactions, the Sub-Fund is exposed to operational risks such as delay or failure of settlement. Such delays and failure may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
- 11. Risks associated with Stock Connect**
- The current regulations and rules on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations which may restrict the Sub-Fund's ability to invest in A-Shares through Stock Connect on a timely basis (and hence will adversely affect the Sub-Fund to pursue its investment strategy). Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access the PRC markets through the Stock Connect will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.
- 12. Risks associated with Small and Medium Enterprise Board ("SME Board") and/or ChiNext Board of the Shenzhen Stock Exchange**
- *Higher fluctuation on stock prices* – Listed companies on the SME Board and/or ChiNext Board are usually of emerging nature with smaller operating scale. Hence, they are subject to higher fluctuation in stock prices and liquidity and have higher risks and turnover ratios than companies listed on the Main Board of the SZSE ("Main Board").
 - *Over-valuation risk* – Stocks listed on SME Board and/or ChiNext Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
 - *Differences in regulation* – Rules and regulations regarding companies listed on ChiNext Board are less stringent in terms of profitability and share capital than those on the Main Board and SME Board.
 - *Delisting risk* – It may be more common and faster for companies listed on the SME Board and/or ChiNext Board to delist. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.
- 13. Risks relating to A-Shares markets**
- Given that the A-Shares market is considered to be more volatile and unstable (for example, due to the risk of suspension of a particular stock or government intervention), the creation and redemption of Units may be disrupted. A participating dealer is unlikely to create or redeem the Units if it considers that A-Shares may not be available.
 - Market volatility and potential lack of liquidity may result in prices of securities traded on A-Shares market to

fluctuate significantly resulting in substantial changes in the Sub-Fund's net asset value.

14. PRC tax risk

- There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Sub-Fund's investments in the PRC (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund will not make any withholding corporate income tax provision on the gross realized or unrealized capital gains derived from the trading of A-Shares via Stock Connect.
- If actual tax is collected by the State Taxation Administration of the PRC and the Sub-Fund is required to make payments reflecting tax liabilities for which no provision has been made, the net asset value of the Sub-Fund may be adversely affected, as the Sub-Fund will ultimately have to bear the full amount of tax liabilities. In this case, the tax liabilities will only impact Units in issue at the relevant time, and the then existing unitholders and subsequent unitholders will be disadvantaged as such unitholders will bear, through the Sub-Fund, a disproportionately higher amount of tax liabilities as compared to that borne at the time of investment in the Sub-Fund.

15. Concentration risk

- The Sub-Fund's investments are concentrated in PRC companies that are active in biotechnology sector may result in greater volatility in the value of the Sub-Fund than more diverse portfolios which comprise broad-based global investments.
- The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the PRC market.

16. Passive investment risk

- The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the Underlying Index are expected to result in corresponding falls in the value of the Sub-Fund.

17. Tracking error risk

- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Underlying Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Underlying Index.

18. Trading risks

- The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Sub-Fund's net asset value.
- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Units on the SEHK, investors may pay more than the net asset value per Unit when buying Units on the SEHK, and may receive less than the net asset value per Unit when selling Units on the SEHK.

19. Trading differences risks

- As the relevant stock exchanges in China or the United States may be open when the Units in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Units.
- Differences in trading hours between the relevant stock exchanges in China or the United States and the SEHK may also increase the level of premium or discount of the Unit price to its net asset value.
- A-Shares are subject to trading bands which restrict increase and decrease in the trading price. Units listed on the SEHK are not. This difference may also increase the level of premium or discount of the Unit price to its net asset value.

20. Termination risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Underlying Index is no longer available for benchmarking or if the size of the Sub-Fund falls below HK\$50 million (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

21. Reliance on market maker risks

- Although the Manager will use its best endeavours to put in place arrangements so that at least one market maker will maintain a market for the Units traded in each counter and that at least one market maker to each

counter gives not less than three months' notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for the Units may be adversely affected if there is no or only one market maker for a counter. There is also no guarantee that any market making activity will be effective.

22. Distributions paid out of capital risk

- Payments of distributions out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the net asset value per Unit of the Sub-Fund and will reduce the capital available for future investment.

23. Dual counter risk

- If there is a suspension of the inter-counter transfer of Units between the HKD counter and the USD counter and/or any limitation on the level of services by brokers and CCASS participants, unitholders will only be able to trade their Units in one counter only, which may inhibit or delay an investor dealing. The market price of Units traded in each counter may deviate significantly. As such, investors may pay more or receive less when buying or selling Units traded in HKD on the SEHK than in respect of Units traded in USD and vice versa.

How has the Sub-Fund performed?

Since the Sub-Fund is newly set up, there is insufficient data available to provide a useful indication of past performance to investors.

Sub-Fund launch date: 25 July 2019

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the Sub-Fund on SEHK

Fee	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% ¹ of the trading price
Trading fee	0.005% ² of the trading price
Stamp duty	Nil
Inter-counter Transfer	HK\$5 ³

¹ Transaction levy of 0.0027% of the trading price of the Units, payable by each of the buyer and the seller.

² Trading fee of 0.005% of the trading price of the Units, payable by each of the buyer and the seller.

³ HKSCC will charge each CCASS participant a fee of HK\$5 per instruction for effecting an inter-counter transfer between one counter and the other counter. Investors should check with their brokers regarding any additional fees.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the net asset value of the Sub-Fund which may affect the trading price.

	Annual rate (as a % of the Sub-Fund's net asset value)
Management fee *	0.50% per annum
Trustee fee *	Up to 0.05% per annum (subject to a minimum fee of US\$2,500 per month)
Performance fee	Not applicable
Administration fee	Not applicable

* Please note that such a fee may be increased up to a permitted maximum amount by providing one month's prior notice to unitholders. Please refer to the "Fees and Expenses" section of the Prospectus for details.

Other fees

You may have to pay other fees when dealing in the Units of the Sub-Fund. Please refer to the Prospectus for details.

Additional information

You can find the following information of the Sub-Fund in English and Chinese (unless otherwise specified) at the following website at www.am.miraeasset.com.hk/globalx (which has not been reviewed or approved by the SFC):

- the Prospectus and this product key facts statement in respect of the Sub-Fund (as revised from time to time);
- the latest annual and interim financial reports (in English only);
- any public announcements made by the Sub-Fund, including information with regard to the Sub-Fund and the Underlying Index, the notices of the suspension of the creation and redemption of Units, the suspension of the calculation of the net asset value, changes in fees and charges and the suspension and resumption of trading of Units;
- any notices relating to material changes to the Sub-Fund which may have impact on its investors such as material alterations or additions to the Prospectus, this product key facts statement in respect of the Sub-Fund or the constitutive documents of the Fund;
- the full portfolio information of the Sub-Fund (updated on a daily basis);
- the real time or near real time indicative net asset value per Unit in HKD and USD of the Sub-Fund throughout each dealing day updated every 15 seconds throughout the SEHK trading hours;
- the last net asset value of the Sub-Fund in RMB only, and the last net asset value per Unit in HKD and USD of the Sub-Fund;
- the past performance information of the Sub-Fund;
- the ongoing charges of the Sub-Fund;
- the actual tracking difference and tracking error of the Sub-Fund;
- composition of distributions (i.e. the relative amounts paid out of net distributable income and capital, if any, for a 12-month rolling period); and
- the latest list of participating dealers and market makers for the Sub-Fund.

The real time or near real time indicative net asset value per Unit of the Sub-Fund in HKD and USD is indicative and is for reference only. This is updated every 15 seconds during SEHK trading hours. The real time or near real time indicative net asset value per Unit in HKD and USD does not use a real time HKD:RMB and USD:RMB foreign exchange rate respectively – it is calculated using the indicative net asset value per Unit in RMB multiplied by an assumed foreign exchange rate using mid rate for offshore RMB (CNH) quoted by Bloomberg at 2:00 p.m. Hong Kong time on the previous SEHK trading day. Since the indicative net asset value per Unit in RMB will not be updated when the underlying A-Shares market is closed, the change to the indicative net asset value per Unit in HKD and USD (if any) during such period is solely due to the change in the foreign exchange rate.

The last net asset value per Unit in HKD and USD is indicative, is for reference only and each is calculated using the last net asset value per Unit in RMB multiplied by an assumed foreign exchange rate using mid rate for offshore RMB (CNH) quoted by Bloomberg at 2:00 p.m. Hong Kong time as of the same dealing day (i.e. any day on which the SEHK, the Shanghai Stock Exchange and the Shenzhen Stock Exchange are open for normal trading). When the underlying A-Shares market is closed, the official last net asset value per Unit in RMB and the indicative last net asset value per Unit in HKD and USD will not be updated. Please refer to the Prospectus for details.
