Global X Hang Seng TECH
ETF

IMPORTANT INFORMATION

Investors should not base investment decisions on this document alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of principal. Investors should note:

- Global X Hang Seng TECH ETF (the "Fund") seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Hang Seng TECH Index (the "Index").
- The Fund's investments are concentrated in companies with a technology theme. Technology companies are often characterised by relatively higher volatility in price performance. Companies in the technology sector also face intense competition, and there may also be substantial government intervention, which may have an adverse effect on profit margins. These companies are also subject to the risks of loss or impairment of intellectual property rights or licences, cyber security risks resulting in undesirable legal, financial, operational and reputational consequences.
- The Fund's investments are concentrated in securities listed on the Stock Exchange of Hong Kong (the "SEHK") of companies that are active in technology sector may result in greater volatility in the value of the Fund than more diverse portfolios which comprise broad-based global investments. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the technology sector.
- The Index is subject to concentration risk as a result of tracking the performance of securities incorporated in, or with majority of revenue derived from, or with a principal place of business in, the Greater China region. The Fund's NAV is therefore likely to be more volatile than a broad-based fund.
- As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests.
- The trading price of the Fund unit (the "Unit") on the SEHK is driven by market factors such as demand and supply of the Unit. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value.
- Dividends may be paid from capital or effectively out of capital of the Fund, which may amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment and result in an immediate reduction in the Net Asset Value per Unit of the Fund.

INVESTMENT OBJECTIVES

The Fund is a passive ETF seeks to provide investment results that before deduction of fees and expenses, closely correspond to the performance of the Hang Seng TECH Index(the "Index").
