Global X Asia USD Investment Grade Bond ETF

Category: Income
As of 30/06/2024

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- Global X Asia USD Investment Grade Bond ETF's (the "Fund's") objective is to provide investment results that, before fees and expenses, closely correspond to the performance of the Bloomberg Asia ex Japan USD Investment Grade Bond Index (the "Index").
- The Index is a new index. The Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Index. The Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.
- The base currency of the Fund is USD but the trading currencies of the Fund are in HKD and USD. The Net Asset Value of the Fund and its performance may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- Investing in the Fund may expose to risks including credit / counterparty risk, Interest rate risk, volatility and liquidity risk, downgrading risk, sovereign debt risk, valuation risk, credit ratings risk.
- The Index is subject to concentration risk as a result of tracking the performance of bonds in the Asian (excluding Japanese) market. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting Asia.
- The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests.
- Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Fund and will reduce the capital available for future investment.
- The trading price of the Fund's unit (the "Unit") on the Stock Exchange of Hong Kong is driven by market factors such as demand and supply of the Unit. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value.

INVESTMENT OBJECTIVES

The investment objective of the Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the Bloomberg Asia ex Japan USD Investment Grade Bond Index (the "Index").
