IMPORTANT INFORMATION

Investors should not base investment decisions on this document alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

- Global X China Semiconductor ETF's (the "Fund's") investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.
- Semiconductor industry may be affected by particular economic or market events, such as domestic and international competition pressures, rapid obsolescence of products, the economic performance of the customers of semiconductor companies and capital equipment expenditures. These companies rely on significant spending on research and development that may cause the value of securities of all companies within this sector of the market to deteriorate.
- China is an emerging market. The Fund invests in Chinese companies which may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The trading price of the Fund's unit (the "Unit") on the Stock Exchange of Hong Kong is driven by market factors such as demand and supply of the Unit. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value.

INVESTMENT OBJECTIVES

The investment objective of the Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the FactSet China Semiconductor Index (the "Index").
