

**Global X Exchange Traded Funds Series OFC -
Global X China Robotics and AI ETF
September 2021**

Issuer: Mirae Asset Global Investments (Hong Kong) Limited

- This is a passive exchange traded fund.
- This statement provides you with key information about this product.
- This statement is a part of the Prospectus.
- You should not invest in this product based on this statement alone.

Quick facts

Stock code:	HKD counter: 02807 USD counter: 09807
Trade lot size:	HKD counter: 50 Shares USD counter: 50 Shares
Manager:	Mirae Asset Global Investments (Hong Kong) Limited
Custodian:	Cititrust Limited
Administrator	Citibank, N.A., Hong Kong Branch
Ongoing charges over a year*:	0.68%
Estimated annual tracking difference^:	-2.00%
Underlying Index:	FactSet China Robotics and Artificial Intelligence Index (net total return)
Base currency:	Renminbi (RMB)
Trading currency:	HKD counter: Hong Kong dollars (HKD) USD counter: United States dollars (USD)
Financial year end of the Sub-Fund:	31 March
Distribution policy:	Annually (usually in May of each year) at the Manager's discretion. Distributions may be paid out of capital or effectively out of capital, but may not be so paid if the cost of the Sub-Fund's operations is higher than the return from management of the Sub-Fund's cash and holdings of investment products. Distributions on any Shares (whether traded in HKD or USD counter) will be in RMB only.
ETF Website#:	https://www.globalxetfs.com.hk/

* The ongoing charges figure is an annualised figure based on the ongoing expenses of the Sub-Fund, expressed as a percentage of the Sub-Fund's average net asset value over the same period. The figure may vary from year to year. The Sub-Fund adopts a single management fee structure with effect from 1 October 2021, whereby a single flat fee will be paid out of the assets of the Sub-Fund to cover all of the costs, fees and expenses of the Sub-Fund. From 1 October 2021 onwards, the ongoing charges of the Sub-Fund are fixed at 0.68% of the Sub-Fund's net asset value, which is equal to the current rate of the management fee of the Sub-Fund. For the avoidance of doubt, any ongoing expenses of the Sub-Fund exceeding the ongoing charges of the Sub-Fund (i.e. the management fee) shall be borne by the Manager and shall not be charged to the Sub-Fund. Please refer to the below section headed "Ongoing fees payable by the Sub-Fund" and the Prospectus for further details.

^ This is an estimated annual tracking difference. Investors should refer to the Sub-Fund's website for more up-to-date information on the actual tracking difference.

This website has not been reviewed or approved by the SFC.

What is this product?

- Global X China Robotics and AI ETF (the "Sub-Fund") is a sub-fund of the Global X Exchange Traded Funds Series OFC (the "Company"), which is a public umbrella open-ended fund company established under Hong Kong law with variable capital with limited liability and segregated liability between sub-funds.
- The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "Code"). The Shares of the Sub-Fund (the "Shares") are traded on The Stock Exchange of Hong Kong Limited (the "SEHK") like stocks. The Sub-Fund is denominated in RMB. Creations and redemptions are in RMB only.

Objective and investment strategy

Objective

The investment objective of the Sub-Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the FactSet China Robotics and Artificial Intelligence Index (the “Index”).

Strategy

In seeking to achieve the Sub-Fund’s investment objective, the Manager will primarily use a full replication strategy through investing directly in constituent stocks of the Index in substantially the same weightings in which they are included in the Index. The Sub-Fund may invest in (including but not limited to) the following securities related to the People’s Republic of China (the “PRC”) including mainland China (“Mainland China”): A-Shares, H-Shares, N-Shares, P-Chips and Red Chips. The Sub-Fund will invest in A-Shares included in the Index through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect (collectively the “Stock Connect”), which may include stocks on the ChiNext Board of the Shenzhen Stock Exchange. The Sub-Fund may also invest in American Depositary Receipts (“ADRs”) which are eligible for inclusion in the Index.

Where the adoption of a full replication strategy is not efficient or practicable or where the Manager considers appropriate in its absolute discretion, the Manager may pursue a representative sampling strategy and hold a representative sample of the constituent securities of the Index selected by the Manager using rule-based quantitative analytical models to derive a portfolio sample. In pursuing a representative sampling strategy, the Manager may cause the Sub-Fund to deviate from the Index weighting on the condition that the maximum deviation from the index weighting of any constituent will not exceed 3 percentage points above or below such weighting.

Investors should note that the Manager may switch between the full replication strategy and the representative sampling strategy without prior notice to investors, in its absolute discretion as often as it believes appropriate in order to achieve the investment objective of the Sub-Fund by tracking the Index as closely (or efficiently) as possible for the benefit of investors.

Currently, the Manager has no intention to invest the Sub-Fund in any financial derivative instruments for investment purposes, but may use financial derivative instruments for hedging purposes only, and will not enter into securities lending transactions, repurchase or reverse repurchase transactions and other similar over-the-counter transactions. The Manager will seek the prior approval of the SFC (if required) and provide at least one month’s prior notice to Shareholders before the Manager engages in any such investments.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Part 1 of the Prospectus.

Index

The Index is a free float market capitalisation weighted index and an equity benchmark designed to track the performance of companies either headquartered or incorporated in Mainland China and Hong Kong which focus on productising and developing hardware and software products with the ability to perform tasks with a high level of precision and automation. The Index seeks to capture main players throughout the robotics and artificial intelligence value chain, including industrial automation machineries artificial intelligence software, and robotics line makers.

The Index comprises of securities (including common stocks and ADRs) which are issued by companies either headquartered or incorporated in Mainland China or Hong Kong, and listed in Hong Kong, Mainland China or the United States. Companies are categorised into two themes: (i) industrial automation machineries and robotics makers or (ii) artificial intelligence software. Shortlisted companies for each category must include mentions of keywords (which are subject to regular review and revision) related to their respective themes in either their FactSet Research Systems Inc. (“FactSet” or the “Index Provider”) company descriptions or their Business Overview section in their annual report filings, and are classified as a “Level 6” sub-industry which relates to their respective themes (a list of which is set out in the Prospectus) based on a proprietary industry classification matrix used by FactSet to determine the economic sector of securities. In addition, the companies’ return on equity for the last twelve months (being the last twelve month’s net income divided by shareholders’ equity) must be greater than zero.

The Index methodology was developed by FactSet and the Index was launched on 30 July 2020. The Manager (and each of its Connected Persons) is independent of the Index Provider. Solactive AG (the “Index Calculation Agent”) is responsible for the operation, calculation, maintenance and record keeping in respect of the Index.

The Index is a net total return index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. The Index is denominated and quoted in RMB. As at 30 June 2021, it comprised 25 constituent stocks with total market capitalisation of approximately RMB2,041 billion.

Details of the index methodology of the Index can be found on <https://www.factset.com/company/resource-library?topic=Index%2BSolutions> (the website has not been reviewed or approved by the SFC). The Index Composition (including list of constituents and their respective weightings) can be found on

<https://www.factset.com/company/resource-library?topic=Index%2BSolutions> (the website has not been reviewed or approved by the SFC).

The Index is distributed under the following identifier:

Bloomberg: FDSAINTR Index

Use of derivatives/ investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's net asset value.

What are the key risks?

Investment involves risks. You may suffer substantial / total loss by investing in this Sub-Fund. Please refer to the Prospectus for details including the risk factors.

1. General investment risk

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Equity market risk

- The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political, geopolitical and economic conditions and issuer-specific factors.
- The stock of small-capitalisation/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.

3. Robotics and artificial intelligence sector risk

- The Sub-Fund invests primarily in the equity securities of companies in the robotics and artificial intelligence sector and, as such, is particularly sensitive to risks to those types of companies. These risks include, but are not limited to, small or limited markets for such securities, changes in business cycles, world economic growth, technological progress, rapid obsolescence, and government regulation. Securities of robotics and artificial intelligence companies, especially companies which have a relatively small market capitalisation and limited operating history, tend to be more volatile than securities of companies that do not rely heavily on technology. Rapid change to technologies that affect a company's products could have a material adverse effect on such company's operating results. Robotics and artificial intelligence companies may rely on a combination of patents, copyrights, trademarks and trade secret laws to establish and protect their proprietary rights in their products and technologies. There can be no assurance that the steps taken by these companies to protect their proprietary rights will be adequate to prevent the misappropriation of their technology or that competitors will not independently develop technologies that are substantially equivalent or superior to such companies' technology. Increasing global regulatory scrutiny in relation to the collection, storage and usage of data may also impede the development of new robotics and artificial intelligence products, hamper the commercial rollout of such products and affect the market demand.
- Companies in the robotics and artificial intelligence sector also typically rely on heavy and significant spending on research and development, and there is no guarantee that the products produced by these companies will materialise into commercially successful products. Furthermore, as the robotics and artificial intelligence sector may be deemed sensitive to national interests, the sector may be subject to government intervention, sanctions and trade protectionism. The success of companies in the robotics and artificial intelligence sector is typically dependent on the companies' ability to maintain relationships with their technology partners. If a company's relationship with a technology partner were impaired or terminated, the company may not be able to enter into a new technology alliance on a timely basis or on commercially favourable terms, which could result in significant additional cost or disruptions to its businesses.

4. Concentration risk

- The Sub-Fund's investments are concentrated in the robotics and artificial intelligence sector in Mainland China and Hong Kong. The Sub-Fund's value may be more volatile than that of a fund with a more diverse portfolio.
- The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting Mainland China and Hong Kong market.

5. Currency risk

- The base currency and certain underlying investments of the Sub-Fund are denominated in RMB, but the trading currencies of the Sub-Fund are in HKD and USD. The net asset value of the Sub-Fund and its performance may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

6. Mainland China related risks

- Mainland China is an emerging market. The Sub-Fund invests in Mainland Chinese companies which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks / control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.

- The A-Share market in Mainland China is highly volatile and may be subject to potential settlement difficulties. Prices of A-Shares may rise and fall significantly and may fluctuate to a greater degree than more developed markets. Such volatility may result in suspension of A-Shares or imposition of other measures by Mainland Chinese authorities affecting the dealing/trading of Shares, disrupting the creation and redemption of Shares, and adversely affecting the value of the Sub-Fund. A Participating Dealer is also unlikely to create or redeem Shares if it considers that A-Shares may not be available.
- Securities exchanges in Mainland China markets typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.

7. RMB currency and conversion risks

- RMB is currently not freely convertible and is subject to exchange controls and restrictions.
- Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund.
- Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Under exceptional circumstances, payment of redemptions and/or distribution payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

8. RMB distributions risk

- Investors should note that where a Shareholder holds Shares traded under the HKD or USD counter, the relevant Shareholder will only receive distributions in RMB and not HKD or USD. In the event the relevant Shareholder has no RMB account, the Shareholder may have to bear the fees and charges associated with the conversion of such distribution from RMB into HKD, USD or any other currency. Shareholders are advised to check with their brokers concerning arrangements for distributions.

9. Stock Connect risks

- The relevant regulations and rules on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

10. ChiNext market risks

- *Higher fluctuation on stock prices and liquidity risk* – Listed companies on the ChiNext market are usually of emerging nature with smaller operating scale. In particular, listed companies on ChiNext market are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the Main Board of the SZSE and the SSE (collectively, the "Main Boards").
- *Over-valuation risk* – Stocks listed on the ChiNext market may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- *Differences in regulation* – Rules and regulations regarding companies listed on ChiNext market are less stringent in terms of profitability and share capital than those on the Main Boards.
- *Delisting risk* – It may be more common and faster for companies listed on the ChiNext market to delist. In particular, ChiNext market have stricter criteria for delisting compared to other boards. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.

Investments in the ChiNext market may result in significant losses for the Sub-Fund and its investor.

11. Risks associated with ADRs

- Exposure to ADRs may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks held by the depositary bank from the bank's own assets and liquidity risks (as ADRs are often less liquid than the underlying stock). Bankruptcy events in respect of the depositary banks may lead to trading suspension and thereafter a freeze of the price of the ADRs affected, which may negatively affect the performance and/or liquidity of the Sub-Fund. Also, holders of ADRs generally do not have the same right as the direct shareholders of the underlying stocks. The performance of ADRs may also be impacted by the related fees.

12. Risk of reliance on the Index Calculation Agent

- The Index Provider relies on the Index Calculation Agent to calculate and maintain the Index and to provide continuous support in terms of index expertise. If the Index Calculation Agent ceases to provide such support to the Index Provider or to act as index calculation agent of the Index, the Index Provider may not be able to immediately find a successor index calculation agent with the requisite expertise or resources and any new appointment may not be on equivalent terms or of similar quality, and this may negatively affect the Sub-Fund. This risk is however minimised as the Index Provider has a list of candidates who are eligible to

take up the role of index calculation agent of the Index.

13. Mainland China tax risk

- There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Sub-Fund's investments in Mainland China (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund will not make any withholding corporate income tax provision on the gross realized or unrealized capital gains derived from the trading of A-Shares via Stock Connect.
- If actual tax is collected by the State Taxation Administration of the PRC and the Sub-Fund is required to make payments reflecting tax liabilities for which no provision has been made, the net asset value of the Sub-Fund may be adversely affected, as the Sub-Fund will ultimately have to bear the full amount of tax liabilities. In this case, the tax liabilities will only impact Shares in issue at the relevant time, and the then existing Shareholders and subsequent Shareholders will be disadvantaged as such Shareholders will bear, through the Sub-Fund, a disproportionately higher amount of tax liabilities as compared to that borne at the time of investment in the Sub-Fund.

14. Passive investment risk

- The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the Index are expected to result in corresponding falls in the value of the Sub-Fund.

15. Tracking error risk

- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

16. Trading risks

- The trading price of the Shares on the SEHK is driven by market factors such as the demand and supply of the Shares. Therefore, the Shares may trade at a substantial premium or discount to the Sub-Fund's net asset value.
- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Shares on the SEHK, investors may pay more than the net asset value per Share when buying Shares on the SEHK, and may receive less than the net asset value per Share when selling Shares on the SEHK.

17. Trading differences risks

- As the relevant stock exchanges in Mainland China or the United States may be open when the Shares in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Shares.
- Differences in trading hours between the relevant stock exchanges in Mainland China or the United States and the SEHK may also increase the level of premium or discount of the Share price to its net asset value.
- A-Shares are subject to trading bands which restrict increase and decrease in the trading price. Shares listed on the SEHK are not. This difference may also increase the level of premium or discount of the Share price to its net asset value.

18. Termination risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the net asset value of the Sub-Fund is less than HK\$50,000,000 (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

19. Reliance on market maker risk

- Although the Manager will use its best endeavours to put in place arrangements so that at least one Market Maker will maintain a market for the Shares, and that at least one Market Maker gives not less than three months' notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for Shares may be adversely affected if there is no or only one Market Maker for the Shares. There is also no guarantee that any market making activity will be effective

20. Distributions paid out of capital / effectively out of capital risk

- Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the net asset value per Share of the Sub-Fund and will reduce the capital available for future investment.

21. Dual counter risk

- If there is a suspension of the inter-counter transfer of Shares between the counters and/or any limitation on the level of services by brokers and CCASS participants, Shareholders will only be able to trade their Shares in one counter only, which may inhibit or delay an investor dealing. The market price of Shares traded in each counter

may deviate significantly. As such, investors may pay more or receive less when buying or selling Shares traded in one counter than the equivalent amount in the currency of another counter if the trade of the relevant Shares took place on that other counter.

How has the Sub-Fund performed?

Since the Sub-Fund is newly set up, there is insufficient data available to provide a useful indication of past performance to investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the Sub-Fund on SEHK

Fee	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% ¹ of the trading price
Trading fee	0.005% ² of the trading price
Stamp duty	Nil
Inter-counter Transfer	HK\$5 ³

¹ Transaction levy of 0.0027% of the trading price of the Shares, payable by each of the buyer and the seller.

² Trading fee of 0.005% of the trading price of the Shares, payable by each of the buyer and the seller.

³ HKSCC will charge each CCASS participant a fee of HK\$5 per instruction for effecting an inter-counter transfer between one counter and the other counter. Investors should check with their brokers regarding any additional fees.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the net asset value of the Sub-Fund which may affect the trading price.

	Annual rate (as a % of the Sub-Fund's net asset value)
Management fee *	Currently 0.68% per annum
Custodian fee	Included in the management fee
Performance fee	Not applicable
Administration fee	Not applicable
Sub-Custodian fee	Included in the management fee
Registrar fee	Included in the management fee

* The management fee is a single flat fee to cover all of the Sub-Fund's fees, costs and expenses (and its due proportion of any costs and expenses of the Company allocated to it). As the management fee is a single fixed rate, the ongoing charges figure of the Sub-Fund will be equal to the management fee. Any costs, fees and expenses associated with the Sub-Fund exceeding the current management fee of 0.68% per annum shall be borne by the Manager and shall not be charged to the Sub-Fund. Please note that the management fee may be increased up to a permitted maximum amount by providing one month's prior notice to Shareholders. Please refer to the "Fees and Expenses" section of the Prospectus for details.

Other fees

You may have to pay other fees when dealing in the Shares of the Sub-Fund. Please refer to the Prospectus for details.

Additional information

You can find the following information relating to the Sub-Fund (in English and Chinese) at the following website at <https://www.globalxetfs.com.hk/> (which has not been reviewed or approved by the SFC):

- The Prospectus including this Product Key Facts Statement (as revised from time to time)

- The latest annual financial reports and interim half yearly unaudited financial reports (in English only)
- Any notices relating to material changes to the Sub-Fund which may have an impact on its investors such as material alterations or additions to the Prospectus (including this Products Key Facts Statement) or any of the constitutive documents of the Company and/or a Sub-Fund
- Any public announcements made by the Manager in respect of the Sub-Fund, including information with regard to the Sub-Fund and the Index, the suspension of the creations and redemptions of Shares, the suspension of the calculation of its net asset value, changes in its fees and the suspension and resumption of trading in its Shares
- The near real time indicative net asset value per Share of the Sub-Fund in RMB, HKD and USD (updated every 15 second throughout each dealing day)
- The last net asset value of the Sub-Fund in RMB only and the last net asset value per Share of the Sub-Fund in RMB, HKD and USD (updated on a daily basis on each Dealing Day)
- The past performance information of the Sub-Fund
- The annual tracking difference and tracking error of the Sub-Fund
- The full portfolio information of the Sub-Fund (updated on a daily basis)
- The latest list of the Participating Dealers and Market Makers for the Sub-Fund
- The composition of distributions (i.e. the relative amounts paid out of (i) net distributable income, and (ii) capital), if any, for a 12-month rolling period

The near real time indicative net asset value per Share in HKD and USD referred to above is indicative and for reference only. This is updated every 15 seconds during SEHK trading hours and is calculated by ICE Data Services.

The near real time indicative net asset value per Share in HKD and USD is calculated by ICE Data services using the near real time indicative net asset value per Share in RMB multiplied by a real time HKD:RMB and USD:RMB foreign exchange rate provided by ICE Data Services Real-Time FX Rate. Since the net asset value per Share in RMB will not be updated when the underlying A-Share market is closed, the change to the indicative net asset value per Share in HKD and USD (if any) during such period is solely due to the change in the foreign exchange rate.

The last net asset value per Share in HKD and USD is indicative, is for reference only and is each calculated using the last net asset value per Share in RMB multiplied by the HKD:RMB and USD:RMB exchange rate quoted by Thomson Reuters at 4:00pm (London Time) as of the same Dealing Day provided by the Custodian. The official last net asset value per Share in RMB and the indicative last net asset value per Share in HKD and USD will not be updated when the underlying A-Share market is closed. Please refer to the Prospectus for details.
