

**Issuer: Mirae Asset Global Investments (Hong Kong) Limited**

- This is a passive exchange traded fund.
- This statement provides you with key information about this product.
- This statement is a part of the Prospectus.
- You should not invest in this product based on this statement alone.

### Quick facts

<b>Stock code:</b>	HKD counter: 02809 USD counter: 09809
<b>Trade lot size:</b>	HKD counter: 50 Shares USD counter: 50 Shares
<b>Manager:</b>	Mirae Asset Global Investments (Hong Kong) Limited
<b>Custodian:</b>	Cititrust Limited
<b>Administrator</b>	Citibank, N.A., Hong Kong Branch
<b>Ongoing charges over a year*:</b>	Estimated to be 0.68%
<b>Estimated annual tracking difference^:</b>	-2.00%
<b>Underlying Index:</b>	Solactive China Clean Energy Index (net total return)
<b>Base currency:</b>	Renminbi (RMB)
<b>Trading currency:</b>	HKD counter: Hong Kong dollars (HKD) USD counter: United States dollars (USD)
<b>Financial year end of the Sub-Fund:</b>	31 March
<b>Distribution policy:</b>	Annually (usually in May of each year) at the Manager's discretion. Distributions may not be paid if the cost of the Sub-Fund's operations is higher than the yield from management of the Sub-Fund's cash and holdings of investment products. Distributions may be paid out of capital or effectively out of capital. <b>Distributions on any Shares (whether traded in HKD or USD counter) will be in RMB only.</b>
<b>ETF Website<sup>#</sup>:</b>	<a href="http://www.am.miraeasset.com.hk/globalx">www.am.miraeasset.com.hk/globalx</a>

\* As the Sub-Fund (as defined below) is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average net asset value over the same period. It may be different upon actual operation of the Sub-Fund and may vary from year to year.

^ This is an estimated annual tracking difference. Investors should refer to the Sub-Fund's website for more up-to-date information on the actual tracking difference.

### What is this product?

- Global X China Clean Energy ETF (the "Sub-Fund") is a sub-fund of the Global X Exchange Traded Funds Series OFC (the "Company"), which is a public umbrella open-ended fund company established under Hong Kong law with variable capital with limited liability and segregated liability between sub-funds.
- The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "Code"). The Shares of the Sub-Fund (the "Shares") are traded on The Stock Exchange of Hong Kong Limited (the "SEHK") like stocks. The Sub-Fund is denominated in RMB. Creations and redemptions are in RMB only.

### Objective and investment strategy

#### Objective

The investment objective of the Sub-Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the Solactive China Clean Energy Index (the "Index").

## Strategy

In seeking to achieve the Sub-Fund's investment objective, the Manager will primarily use a full replication strategy through investing directly in constituent stocks of the Index in substantially the same weightings in which they are included in the Index. The Sub-Fund may invest in (including but not limited to) the following PRC-related securities: A-Shares, H-Shares, N-Shares, P-Chips and Red Chips. The Sub-Fund will invest in A-Shares included in the Index through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect (collectively the "Stock Connect"), which may include stocks on the Small and Medium Enterprise Board (the "SME Board") and/or ChiNext Board of the Shenzhen Stock Exchange.

Where the adoption of a full replication strategy is not efficient or practicable or where the Manager considers appropriate in its absolute discretion, the Manager may pursue a representative sampling strategy and hold a representative sample of the constituent securities of the Index selected by the Manager using quantitative analytical models to derive a portfolio sample. In pursuing a representative sampling strategy, the Manager may cause the Sub-Fund to deviate from the Index weighting on the condition that the maximum deviation from the index weighting of any constituent will not exceed 3 percentage points above or below such weighting.

Investors should note that the Manager may switch between the full replication strategy and the representative sampling strategy without prior notice to investors, in its absolute discretion as often as it believes appropriate in order to achieve the investment objective of the Sub-Fund by tracking the Index as closely (or efficiently) as possible for the benefit of investors.

Currently, the Manager has no intention to invest the Sub-Fund in any financial derivative instruments for investment purposes, but may use financial derivative instruments for hedging purposes only, and will not enter into sale and repurchase transactions, reverse repurchase transactions or other similar over-the-counter transactions. The Manager will seek the prior approval of the SFC (if required), and provide at least one month's prior notice to Shareholders before the Manager engages in any such investments.

The Manager may, on behalf of the Sub-Fund, enter into securities lending transactions with a maximum level of up to 25% and expected level of approximately 20% of its net asset value and is able to recall the securities lent out at any time.

As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the value of the securities lent (interests, dividends and other eventual rights included) valued on a daily basis. The collateral will be subject to safekeeping by the Custodian or an agent appointed by the Custodian. Non-cash collateral received may not be sold, re-invested or pledged. Any re-investment of cash collateral received shall be subject to the requirements as set out in the Code. To the extent the Sub-Fund undertakes securities lending transactions, all revenues (net of direct and indirect expenses as reasonable and normal compensation for the services rendered by the Manager, a securities lending agent and/or other service providers in the context of such transactions to the extent permitted by applicable legal and regulatory requirements) shall be returned to the Sub-Fund.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Part 1 of the Prospectus.

## Index

The Index is a free float market capitalisation weighted index which is designed to represent Chinese companies that are active in the field of clean energy, in particular, companies headquartered in China or Hong Kong with significant exposure to "Affordable and Clean Energy" and its supply chain. "Affordable and Clean Energy" is one of the 17 United Nations Sustainable Development Goals, which is to ensure access to affordable, reliable, sustainable and modern energy. The United Nations Sustainable Development Goals are designed to be the blueprint to achieve a better and more sustainable future for all. For more details, please refer to <https://www.un.org/sustainabledevelopment/sustainable-development-goals/> (this website has not been reviewed by the SFC).

The Index comprises of companies headquartered in China or Hong Kong and listed on one of the following exchanges and should have listing history of at least 6 months: (i) the SEHK in Hong Kong, (ii) the Shanghai Stock Exchange ("SSE") or Shenzhen Stock Exchange ("SZSE") in China; or (iii) the New York Stock Exchange or NASDAQ Stock Market in the United States. In addition, the companies must be from one of these clean energy-related industries according to the FactSet Industries and Economic Sector: (a) Alternative Power Generation, (b) Engineering & Construction, (c) Industrial Specialties, (d) Miscellaneous Manufacturing, (e) Semiconductors, (f) Electrical Products, (g) Electronic Production Equipment (h) Electric Utilities or (i) Chemicals: Specialty. The FactSet Industries and

Economic Sector is a proprietary industry classification matrix used by FactSet to determine the classification of securities. Companies with significant exposure to clean energy will be identified and added to the list of eligible constituents, and as an exclusion policy, companies (i) with insignificant exposure to clean energy and/or (ii) which engage in business(es) that may have adverse environmental impact will be identified and removed from the list of eligible constituents. Such identification is based on the company description included in FactSet and keywords (which are subject to regular review by the oversight committee established by the Index Provider). The companies must also have average daily value traded of at least HKD 20 million over six months prior to and including the selection day of the constituent securities of the Index. Effective from 6 February 2020, if a company is not classified in the sector Utilities according to FactSet Industries and Economic Sector, the company should have a Debt-to-Earnings Before Interest and Tax ratio of less than, or equal to, 30 over the past 12 months.

The Index is compiled and published by Solactive AG (the "Index Provider") and was launched on 20 September 2019. The Manager (and each of its Connected Persons) is independent of the Index Provider.

The Index is a net total return index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. The Index is denominated and quoted in RMB.

As at 30 June 2020, it comprised 20 constituent stocks with total market capitalisation of approximately RMB 1.21 trillion.

You can obtain the list of the constituents of the Index and their respective weightings from the website of the Index Provider <https://www.solactive.com/> (this website has not been reviewed by the SFC), and additional information of the Index from the website of the Index Provider <https://www.solactive.com/> (this website has not been reviewed by the SFC).

The Index is distributed under the following identifiers:

ISIN:	DE000SLA9KD7
WKN:	SLA9KD
Reuters:	.SOLCCEIN
Bloomberg:	SOLCCEIN Index

#### **Use of derivatives/ investment in derivatives**

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's net asset value.

#### **What are the key risks?**

**Investment involves risks. You may suffer substantial / total loss by investing in this Sub-Fund. Please refer to the Prospectus for details including the risk factors.**

##### **1. General investment risk**

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

##### **2. Equity market risk**

- The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political, geopolitical and economic conditions and issuer-specific factors.
- The stock of small-capitalisation/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.

##### **3. Clean energy sector risk**

- Clean energy companies may be dependent on the successful development of new and proprietary technologies. Many clean energy companies are involved in the development and commercialisation of new technologies, which may be subject to delays resulting from budget constraints and technological difficulties. Obsolescence of existing technology, short product cycles, falling prices and profits, competition from new market entrants and general economic conditions also significantly affect the clean energy sector.
- There are also factors external to the companies which may affect the performance of clean energy

companies. Clean energy companies may be highly dependent upon government subsidies and incentives (including but not limited to preferential tax treatments) and contracts with government entities, and may be negatively affected if such subsidies are reduced, such preferential tax treatments expires or are discontinued, or contracts are unavailable due to changes in government policies. In addition, seasonal weather conditions, fluctuations in the supply of, and demand for, clean energy products, changes in energy prices, and international political events may cause fluctuations in the performance of clean energy companies and the prices of their securities.

- Shares in the companies involved in the clean energy have been significantly more volatile than shares of companies operating in other, more established industries. Currently, certain methods used to value companies involved in the alternative power and power technology sectors, particularly those that have not yet traded profitably, have not been in widespread use for a significant period of time. As a result, the use of these valuation methods may increase the volatility of the share prices of certain alternative power and power technology company.

#### **4. Lack of standardised taxonomy**

- There is a lack of standardised taxonomy in relation to sustainable investing strategies and funds with investment focus on climate, green, environmental or sustainable development. The standard of disclosure adopted by these funds in relation to the relevant climate, green, environmental or sustainable development factors or principles may vary.

#### **5. Currency risk**

- The base currency and the underlying investments of the Sub-Fund are denominated in RMB, but the trading currencies of the Sub-Fund are in HKD and USD. The net asset value of the Sub-Fund and its performance may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

#### **6. PRC related risks**

- PRC is an emerging market. The Sub-Fund invests in Chinese companies which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks / control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- The A-Share market in the PRC is highly volatile and may be subject to potential settlement difficulties. Prices of A-Shares may rise and fall significantly and may fluctuate to a greater degree than more developed markets. Such volatility may result in suspension of A-Shares or imposition of other measures by the PRC authorities affecting the dealing/trading of Shares, disrupting the creation and redemption of Shares, and adversely affecting the value of the Sub-Fund. A Participating Dealer is also unlikely to create or redeem Shares if it considers that A-Shares may not be available.
- Securities exchanges in the PRC markets typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.

#### **7. RMB currency and conversion risks**

- RMB is currently not freely convertible and is subject to exchange controls and restrictions.
- Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund.
- Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Under exceptional circumstances, payment of redemptions and/or distribution payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

#### **8. RMB distributions risk**

- Investors should note that where a Shareholder holds Shares traded under the HKD or USD counter, the relevant Shareholder will only receive distributions in RMB and not HKD or USD. In the event the relevant Shareholder has no RMB account, the Shareholder may have to bear the fees and charges associated with the conversion of such distribution from RMB into HKD, USD or any other currency. Shareholders are advised to check with their brokers concerning arrangements for distributions.

#### **9. Stock Connect risks**

- The relevant regulations and rules on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access the PRC markets through

the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

#### **10. SME Board and ChiNext market risks**

- *Higher fluctuation on stock prices* – Listed companies on the SME Board and/or ChiNext Board are usually of emerging nature with smaller operating scale. Hence, they are subject to higher fluctuation in stock prices and liquidity and have higher risks and turnover ratios than companies listed on the Main Board of the SZSE (“Main Board”).
- *Over-valuation risk* – Stocks listed on SME Board and/or ChiNext Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- *Differences in regulation* – Rules and regulations regarding companies listed on ChiNext Board are less stringent in terms of profitability and share capital than those on the Main Board and SME Board.
- *Delisting risk* – It may be more common and faster for companies listed on the SME Board and/or ChiNext Board to delist. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.

#### **11. Securities lending transactions risk**

- The borrower may fail to return the securities in a timely manner or at all. The Sub-Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
- As part of the securities lending transactions, the Sub-Fund must receive cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Sub-Fund.
- By undertaking securities lending transactions, the Sub-Fund is exposed to operational risks such as delay or failure of settlement. Such delays and failure may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.

#### **12. PRC tax risk**

- There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Sub-Fund's investments in the PRC (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund will not make any withholding corporate income tax provision on the gross realized or unrealized capital gains derived from the trading of A-Shares via Stock Connect.
- If actual tax is collected by the State Taxation Administration of the PRC and the Sub-Fund is required to make payments reflecting tax liabilities for which no provision has been made, the net asset value of the Sub-Fund may be adversely affected, as the Sub-Fund will ultimately have to bear the full amount of tax liabilities. In this case, the tax liabilities will only impact Shares in issue at the relevant time, and the then existing Shareholders and subsequent Shareholders will be disadvantaged as such Shareholders will bear, through the Sub-Fund, a disproportionately higher amount of tax liabilities as compared to that borne at the time of investment in the Sub-Fund.

#### **13. Concentration risk**

- The Sub-Fund's investments are concentrated in the clean energy sector in China. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the China market.

#### **14. Passive investment risk**

- The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the Index are expected to result in corresponding falls in the value of the Sub-Fund.

#### **15. Tracking error risk**

- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

#### **16. Trading risks**

- The trading price of the Shares on the SEHK is driven by market factors such as the demand and supply of the Shares. Therefore, the Shares may trade at a substantial premium or discount to the Sub-Fund's net asset value.
- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Shares on the SEHK, investors may pay more than the net asset value per Share when buying Shares on the SEHK, and may receive less than the net asset value per Share when selling Shares on the SEHK.

**17. Trading differences risks**

- As the relevant stock exchanges in the PRC or the United States may be open when the Shares in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Shares.
- Differences in trading hours between the relevant stock exchanges in China or the United States and the SEHK may also increase the level of premium or discount of the Share price to its net asset value.
- A-Shares are subject to trading bands which restrict increase and decrease in the trading price. Shares listed on the SEHK are not. This difference may also increase the level of premium or discount of the Share price to its net asset value.

**18. Termination risk**

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the net asset value of the Sub-Fund is less than HK\$50,000,000 (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

**19. Reliance on market maker risk**

- Although the Manager will use its best endeavours to put in place arrangements so that at least one Market Maker will maintain a market for the Shares, and that at least one Market Maker gives not less than three months' notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for Shares may be adversely affected if there is no or only one Market Maker for the Shares. There is also no guarantee that any market making activity will be effective

**20. Distributions paid out of capital / effectively out of capital risk**

- Payments of distributions out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the net asset value per Share of the Sub-Fund and will reduce the capital available for future investment.

**21. Dual counter risk**

- If there is a suspension of the inter-counter transfer of Shares between the counters and/or any limitation on the level of services by brokers and CCASS participants, Shareholders will only be able to trade their Shares in one counter only, which may inhibit or delay an investor dealing. The market price of Shares traded in each counter may deviate significantly. As such, investors may pay more or receive less when buying or selling Shares traded in one counter than the equivalent amount in the currency of another counter if the trade of the relevant Shares took place on that other counter.

**How has the Sub-Fund performed?**

Since the Sub-Fund is newly set up, there is insufficient data available to provide a useful indication of past performance to investors.

**Is there any guarantee?**

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

**What are the fees and charges?**

**Charges incurred when trading the Sub-Fund on SEHK**

Fee	What you pay
Brokerage fee	Market rates

<b>Transaction levy</b>	0.0027% <sup>1</sup> of the trading price
<b>Trading fee</b>	0.005% <sup>2</sup> of the trading price
<b>Stamp duty</b>	Nil
<b>Inter-counter Transfer</b>	HK\$5 <sup>3</sup>

<sup>1</sup> Transaction levy of 0.0027% of the trading price of the Shares, payable by each of the buyer and the seller.

<sup>2</sup> Trading fee of 0.005% of the trading price of the Shares, payable by each of the buyer and the seller.

<sup>3</sup> HKSCC will charge each CCASS participant a fee of HK\$5 per instruction for effecting an inter-counter transfer between one counter and the other counter. Investors should check with their brokers regarding any additional fees.

### Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the net asset value of the Sub-Fund which may affect the trading price.

	<b>Annual rate (as a % of the Sub-Fund's net asset value)</b>
<b>Management fee *</b>	0.50% per annum
<b>Custodian fee *</b>	Up to 1% per annum, subject to a minimum fee of US\$2,500 per month
<b>Performance fee</b>	Not applicable
<b>Administration fee</b>	Not applicable
<b>Sub-Custodian fee</b>	Included in the Custodian fee
<b>Registrar fee</b>	HK\$20,000 per annum

\* Please note that such a fee may be increased up to a permitted maximum amount by providing one month's prior notice to Shareholders. Please refer to the "Fees and Expenses" section of the Prospectus for details.

### Other fees

You may have to pay other fees when dealing in the Shares of the Sub-Fund. Please refer to the Prospectus for details.

### Additional information

You can find the following information relating to the Sub-Fund (in English and Chinese) at the following website at [www.am.miraeasset.com.hk/globalx](http://www.am.miraeasset.com.hk/globalx) (which has not been reviewed or approved by the SFC):

- The Prospectus including this Product Key Facts Statement (as revised from time to time)
- The latest annual financial reports and interim half yearly unaudited financial reports (in English only)
- Any notices relating to material changes to the Sub-Fund which may have an impact on its investors such as material alterations or additions to the Prospectus (including this Products Key Facts Statement) or any of the constitutive documents of the Company and/or a Sub-Fund
- Any public announcements made by the Manager in respect of the Sub-Fund, including information with regard to the Sub-Fund and the Index, the suspension of the creations and redemptions of Shares, the suspension of the calculation of its net asset value, changes in its fees and the suspension and resumption of trading in its Shares
- The near real time indicative net asset value per Share of the Sub-Fund in RMB, HKD and USD (updated every 15 second throughout each dealing day)
- The last net asset value of the Sub-Fund in RMB only and the last net asset value per Share of the Sub-Fund in RMB, HKD and USD (updated on a daily basis on each Dealing Day)
- The past performance information of the Sub-Fund
- The annual tracking difference and tracking error of the Sub-Fund
- The full portfolio information of the Sub-Fund (updated on a daily basis)
- The latest list of the Participating Dealers and Market Makers for the Sub-Fund
- The composition of distributions (i.e. the relative amounts paid out of (i) net distributable income, and (ii) capital), if any, for a 12-month rolling period

The near real time indicative net asset value per Share in HKD and USD referred to above is indicative and for reference only. This is updated every 15 seconds during SEHK trading hours and is calculated by ICE Data Services.

The near real time indicative net asset value per Share in HKD and USD is calculated using the indicative net asset value per Share in RMB multiplied by an assumed foreign exchange rate using offshore RMB (CNH) rate quoted by

Bloomberg. Since the net asset value per Share in RMB will not be updated when the underlying A-Share market is closed, the change to the indicative net asset value per Share in HKD and USD (if any) during such period is solely due to the change in the foreign exchange rate.

The last net asset value per Share in HKD and USD is indicative, is for reference only and is each calculated using the last net asset value per Share in RMB multiplied by an assumed foreign exchange rate using mid rate for offshore RMB (CNH) quoted by Bloomberg at 2:00 p.m. Hong Kong time as of the same dealing day (i.e. any day on which the SEHK, the Shanghai Stock Exchange and the Shenzhen Stock Exchange are open for normal trading). The official last net asset value per Share in RMB and the indicative last net asset value per Share in HKD and USD will not be updated when the underlying A-Share market is closed. Please refer to the Prospectus for details.

### **Important**

If you are in doubt, you should seek professional advice.
