Investors should not base investment decisions on this content alone. Please refer to the Prospectus for details including product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

**Global X MSCI China ETF's** (the "Fund's") investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer specific factors.

The Fund has a portfolio investing in companies whose operations are primarily in the PRC and therefore is subject to emerging market risks such as risks associated with uncertainty concerning PRC laws and regulations and government policies. Generally, investment in emerging markets such as the PRC are subject to greater risks than developed markets due to greater political, economic and taxation uncertainty and risks linked to volatility, market liquidity, foreign exchange, legal and regulatory risks.

The Fund is subject to concentration risk as a result of tracking the performance of a single geographical region i.e. the PRC. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.

The trading price of the Fund's unit (the "Unit") on the Stock Exchange of Hong Kong is driven by market factors such as demand and supply of the Unit. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value.

As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests. For Hong Kong  
Investors Only

- **All China Exposure:** Enable investors to access a basket of over 600 China securities listed in Hong Kong, China A and others via a single trade.
- **Unprecedented monetary and fiscal policy stimulus combo** launched at end September substantially elevated market sentiments. Further policy (consumption, property, and capital market related) roll out and execution could support real economy recovery.
- **Undemanding valuation:** Despite recent rally, MSCI China still trades at a discount to other EM markets.
- **Major internet platforms** delivers solid earnings through cost optimization and quality-focused growth strategy. With the solid free cash flow generated by their core business, major internet platforms are proactively returning excess cash to investors through share repurchase and cash dividend.
- **EV sales momentum remains strong** in China, with EV penetration close to 50%. Improving Supply-demand dynamics in Battery sector will also support a recovery in capacity utilization rates.

Exchange	HKEX
Reference Index <sup>2</sup>	MSCI China Index

1. The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges figure is an annualised figure based on the ongoing expenses of the Fund, expressed as a percentage of the Fund's average net asset value over the same period. This figure may vary from year to year. The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges of the Fund are fixed at 0.18% of the Fund's net asset value, which is equal to the current rate of the management fee of the Fund. For the avoidance of doubt, any ongoing expenses of the Fund exceeding the ongoing charges of the Fund (i.e. the management fee) shall be borne by the Manager and shall not be charged to the Fund. Please refer to the Key Facts Statement and the Prospectus for further details. 2. The Underlying Index is a net total return, modified free float-adjusted market capitalization weighted index. A net total return index reflects the reinvestment of dividends or coupon payments, after deduction of any withholding tax (including any surcharges for special levies, if applicable).
