Global X China Electric Vehicle and Battery ETF

2845 HKD
9845 USD

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

-The investment objective of Global X China Electric Vehicle and Battery ETF's (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Solactive China Electric Vehicle and Battery Index. - The Fund is exposed to concentration risk by tracking a single region or country. - The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio. - Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility. - The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Fund's synthetic replication strategy may invest up to 50% of its net asset value in financial derivative instruments ("FDIs"), which may expose the Fund to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The Fund may suffer losses from its usage of FDIs. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

FUND DETAILS¹

Stock Code	2845 (HKD) 9845 (USD)
ISIN	HK0000562659 (HKD/USD)
Listing Date	17 Jan 2020
Ongoing Charges Over a Year ²	0.68%
Index ³	Solactive China Electric Vehicle and Battery Index NTR
Board Lot Size	50 Units
Base Currency	RMB
Trading Currency	HKD counter: HKD USD counter: USD
Exchange	HKEX

INVESTMENT POINTS

- The ETF helps investors capture opportunities in EV value chain through investing in leading companies across EV makers, Battery makers, Autoparts makers, and upstream material providers.
- With trade-in stimulus being extended into 2025, the strong sales momentum for China EV could be extended into 2025. Leading domestic brand will continue to gain share.
- Battery sector is nearing an inflection point with improving supply-demand dynamics as battery makers react to overcapacity issues through cutting CAPEX.

Source: MAGIHK, 30 June 2025. ¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, Net Asset Value to Net Asset Value. These figures show how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in RMB including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown, there was insufficient data available in that year to provide performance. The Index of the Fund is Solactive China Electric Vehicle and Battery Index. Fund inception date: 16 January 2020. ²The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges figure is an annualised figure based on the ongoing expenses of the Fund, expressed as a percentage of the Fund's average net asset value over the same period. The figure may vary from year to year. The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The single management fee does not include the fees related to FDIs (including swaps) entered into by the Fund. The ongoing charges of the Fund are fixed at 0.68% of the Fund's net asset value, which is equal to the current rate of the management fee of the Fund. For the avoidance of doubt, any ongoing expenses of the Fund exceeding the ongoing charges of the Fund (i.e. the management fee) shall be borne by the Manager and shall not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³The Index is a net total return, free float market capitalisation weighted index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. ⁴Holdings are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X China Core TECH ETF's (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Mirae Asset China Tech Top 30 Index.
- The Fund is exposed to concentration risk by tracking a single region or country. It is potentially more volatile than a broad-based fund due to adverse conditions in the region.
- The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio.
- The Fund may be exposed to risks associated with different technology sectors and themes. A downturn in these sectors or themes may have adverse effects on the Fund.
- The Fund may be exposed to risks associated with different technology sectors and themes. A downturn in these sectors or themes may have adverse effects on the Fund.
- Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected.
- The trading price of the Fund's unit (the "Unit") on the SEHK is driven by secondary market trading factors. The Units may trade at a substantial premium or discount to the Fund's net asset value.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- **The Rise of China's High-End Technology:** As the global competitiveness of China's tech companies continues to rise, they are expected to deliver good stock returns in the mid-long term.
- **Asset allocation in the G2 Tech era:** The era of G2 technology has arrived, where technology companies from both countries are competing directly and leading the world. This ETF provides a diversification tool to investors with high exposure to US tech stocks.
- **Limited Internet Sector Exposure:** This differentiate the index from other technology indices like Hang Seng Tech index. Large cap internet companies are already well-owned by many investors. Through exclusion of these companies, the ETF serves a diversification tool for investors' technology portfolio. The portfolio also has better revenue/EPS growth prospects with reasonable valuation.

Source: MAGIHK, 15 Jul 2025. ¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in HKD including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is Mirae Asset China Tech Top 30 Index. Fund launch date: 8 July 2025. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Index is a net total return, free float-adjusted market capitalisation weighted index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. ⁴ Holdings are subject to change.

Global X Asia Semiconductor ETF

3119 HKD

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

- Global X Asia Semiconductor ETF's (the "Fund's") investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.
- Semiconductor industry may be affected by particular economic or market events, such as domestic and international competition pressures, rapid obsolescence of products, the economic performance of the customers of semiconductor companies and capital equipment expenditures. These companies rely on significant spending on research and development that may cause the value of securities of all companies within this sector of the market to deteriorate.
- Some Asian securities exchanges (including Mainland China) may have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. Some Asian markets may have higher entry barrier for investments as identification number or certificate may have to be obtained for securities trading. All these may have a negative impact on the Fund.
- The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk, currency devaluation, inflation and the likelihood of a high degree of volatility.
- The trading price of the Fund's unit (the "Unit") on the Stock Exchange of Hong Kong is driven by market factors such as demand and supply of the Unit. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value.
- The Fund's synthetic replication strategy will involve investing up to 50% of its net asset value in financial derivative instruments ("FDIs"), mainly funded total return swap transaction(s) through one or more counterparty(ies). Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. FDIs are susceptible to price fluctuations and higher volatility, and may have large bid and offer spreads and no active secondary markets. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund.
- As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests.

INVESTMENT POINTS

- AI infrastructure investment drives the next semiconductor upcycle
- Asian firms play a crucial role in AI chip manufacturing
- Valuation remains attractive vs US semiconductor peers

INVESTMENT POINTS

- China semiconductor is a large market with ample room for localization rate improvement, as domestic brands account for 35% of global demand while contributing only 7% of capacity supply
- Increasing geopolitical uncertainties post Trump's re-election, coupled with domestic players' cost advantages and service speed, are driving an accelerated domestic substitution.
- Strengthened government support aimed at achieving self-sufficiency, along with rising capital expenditures, will further bolster the industry's growth. China's capability in semiconductor production is becoming increasingly competitive across the value chain.

9826 USD

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X China Cloud Computing ETF's (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Solactive China Cloud Computing Index NTR.
- The Fund is exposed to concentration risk by tracking a single region or country.
- The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio.
- Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected.
- Listed companies on the ChiNext market and/or STAR Board are usually subject to higher fluctuation in stock prices and liquidity risks, over-valuation risk, differences in regulation, delisting risk, and concentration risk.
- There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Fund's investments in Mainland China. Any increased tax liabilities on the Fund may adversely affect the Fund's value.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Fund's synthetic replication strategy may invest up to 50% of its net asset value in financial derivative instruments ("FDIs"), which may expose the Fund to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The Fund may suffer losses from its usage of FDIs.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

FUND DETAILS¹

Stock Code	2826 (HKD) 9826 (USD)
ISIN	HK0000516713 (HKD/USD)

Exchange	HKEX

INVESTMENT POINTS

- Riding on the enterprise digital transformation trend in China
- Current low IT spending for Chinese enterprises implies large potential for cloud penetration growth
- Generative AI could be a secular driver to spur cloud demand and drive enterprise efficiency. Cloud Computing platforms are benefiting from rapid rampup of GenAI demand. Internet and software companies are key AI application beneficiaries in China.

INVESTMENT POINTS

- We see upside potential for China Biotech Sector as bolstered by domestic policy support and Chinese companies' overseas expansion. China's macro easing policy and US FOMC rate cuts bode well for better funding environment for biotech companies to support R&D activity.
- Biotech sector valuation is nearing 5 year trough. Profitability improvement and commercialization ramp-up for biotech companies could lead to improving investor sentiments towards China healthcare.
- AI application in biotech sectors could further accelerate with the emergence of cost-efficient models, which could bring further efficiency gains and cost savings for biotech companies.

Ongoing Charges Over a Year ²	0.68%
Index ³	Solactive China MedTech Index
Board Lot Size	50 Units
Base Currency	RMB
Trading Currency	HKD counter: HKD
Exchange	HKEX

INVESTMENT POINTS

- Medtech sector recorded weak performance in 2024 dragged by multiple headwind including lingering anti-corruption impact and gradual implementation of VBP. Sector could see recovery in 2025 as supported by stimulus program and a lower base in 2024, and we already see sequentially improving tender statistics.
- MoF's Buy China proposal should support accelerating import substitution, which bodes well for domestic leaders.
- Export value to overseas market recorded stable growth despite geopolitical risks. AI offers optionality for medtech companies to enhance products and solutions.

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in RMB including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is Solactive China MedTech Index. Fund inception date: 3 Aug 2023. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. For the avoidance of doubt, the single management fee does not include the fees relating to the FDIs, including swaps, entered into by the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Underlying Index is a net total return, total market capitalisation weighted index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. ⁴ Holdings are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X China Consumer Brand ETF (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Solactive China Consumer Brand Index.
- The Fund is exposed to concentration risk by tracking a single region or country.
- The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio.
- Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Fund's synthetic replication strategy may invest up to 50% of its net asset value in financial derivative instruments ("FDIs"), which may expose the Fund to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The Fund may suffer losses from its usage of FDIs.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- Policy stimulus remains key to enhancing consumer sentiment and boosting stock performance for China consumer in 2025.
- Macroeconomic recovery, bolstered by supportive policies and stabilization of property market, presents the largest upside potential for China's consumer sector in 2025, especially given that demand was under pressure across nearly all subsectors in 2024.
- By subsector, sectors directly targeted by stimulus initiatives, such as home appliance and auto under extended consumer goods trade-in programs, as well as sectors sensitive to macroeconomic changes, such as Baijiu, stand to better benefit.

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Sub-Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in RMB including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is Solactive China Consumer Brand Index. Fund inception date: 16 Jan 2020. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges figure is an annualised figure based on the ongoing expenses of the Fund, expressed as a percentage of the Fund's average net asset value over the same period. The figure may vary from year to year. The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The single management fee does not include the fees related to FDIs (including swaps) entered into by the Fund. The ongoing charges of the Fund are fixed at 0.68% of the Fund's net asset value, which is equal to the current rate of the management fee of the Fund. For the avoidance of doubt, any ongoing expenses of the Fund exceeding the ongoing charges of the Fund (i.e. the management fee) shall be borne by the Manager and shall not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Underlying Index is a net total return, free float market capitalization weighted index. A net total return index reflects the reinvestment of dividends or coupon payments, after deduction of any withholding tax (including any surcharges for special levies, if applicable). ⁴ Holdings are subject to change.

Global X China Clean Energy ETF

2809 HKD
9809 USD

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X China Clean Energy ETF (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Solactive China Clean Energy Index.
- The Fund is exposed to concentration risk by tracking a single region or country.
- The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio.
- Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Fund's synthetic replication strategy may invest up to 50% of its net asset value in financial derivative instruments ("FDIs"), which may expose the Fund to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The Fund may suffer losses from its usage of FDIs.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- In the 2025 Government Work Report, the Chinese government announced a higher-than-expected target for energy emission control, aiming to reduce energy consumption per unit of GDP by 3%, which will promote greater integration of clean energy sources.
- 2809 HK offers diversified exposure to broader clean energy industries: 1) Solar: supply-side reforms are expected to enhance industry dynamics and lead to higher consolidation; 2) Wind: offshore wind installation is expected to accelerate, while we are also constructive on wind equipment for better profitability from exporting; 3) Power and grid equipment: sector benefits from government's increased investment in power grids, growing opportunities in overseas markets and smart grid upgrade; 4) Hydro: strong hydropower generation supported by adequate water flow.

SOLAR: POLICY TAILWINDS TO IMPROVE SUPPLY AND DEMAND DYNAMICS

Date	Policy/Document	Authority	Content
Mar-25	China 2025 Government Work Report	State Council	GWR aims to: 1) reduce energy consumption per unit of GDP by 3%, beating market consensus of 2.5%; 2) Solve the excessive competition issue; 3) Accelerate construction of renewables bases in deserts and power digestion and power transmission infrastructure.
Feb-25	State Council meeting	State Council	China State Council meeting started to discuss and emphasise potential policy to curb oversupply, moving the solar sector a step closer to supply-side reform.
Nov-24	Solar manufacturing standards (2024 official version)	MIIT	Largely similar with the proposal. The main change from the proposal is to reduce the energy consumption standard for new production capacity from 57 kWh/kg to 53 kWh/kg.
Oct-24	Minimum price for module	CPIA	Rmb0.68/W as the lowest module production cost to ensure product quality for the solar sector leaders. And thus it discourages below-cost sales and tenders.
Jul-24	Proposal of solar manufacturing standards (2024 version)	MIIT	For planned and existing capacity, the standard requires the unit power consumption for polysilicon to be below 57kwh/kg and 60kwh/kg and unit power consumption of ingot to be below 23kwh/kg and 26kwh/kg. For planned/existing capacity, the standard requires conversion efficiency of N-type cells to be over 26%/25% and conversion efficiency of N-type modules to be over 23.10%/22.30%
May-24	2024-2025 Energy Conservation and Carbon Reduction Action Plan	State Council	Restricting new capacity expansion for high electricity consumption polysilicon players

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. ² Performance data has been calculated in RMB including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is Solactive China Little Giant Index. Fund inception date: 17 Nov, 2023. ³ The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. For the avoidance of doubt, the single management fee does not include the fees relating to the FDIs, including swaps, entered into by the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ⁴ The Underlying Index is a net total return, total market capitalisation weighted index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. The Index is denominated and quoted in RMB. ⁵ Holdings are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this website/material alone. Please refer to the Prospectus for details including product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Electric Vehicle and Battery Active ETF (the "Fund") is to achieve long term capital growth by primarily investing in companies which are directly or indirectly involved in electric vehicle or electric vehicle-related battery businesses. - The Fund does not seek to track any index or benchmark, it may fail to meet its objective as a result of the Manager's selection of investment, and/or the implementation of processes which may cause the Sub-Fund to underperform as compared to other index tracking funds with a similar objective. - The Fund may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio. - The Fund may invest in small and/or mid-sized companies, which may have lower liquidity and their prices are more volatile to adverse economic developments. - The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected. - Investors should note that Shareholders will only receive distributions in USD and not HKD. Shareholder may have to bear the fees and charges associated with the conversion of such distribution from USD into HKD or any other currency. - Exposure to ADRs and GDRs may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks held by the depositary bank from the bank's own assets and liquidity risks. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

FUND DETAILS¹

Stock Code	3139 (HKD)

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, Net Asset Value to Net Asset Value. These figures show by how much the Sub-Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in USD including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown, there was insufficient data available in that year to provide performance. Fund inception date: 18 March 2022 ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges figure is an annualised figure based on the ongoing expenses of the Fund, expressed as a percentage of the Fund's average net asset value over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.75% of the average Net Asset Value of the Fund. Any ongoing expenses exceeding 0.75% of the average Net Asset Value of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ Holdings are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X India Select Top 10 ETF (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Mirae Asset India Select Top 10 Index.
- The number of constituents of the Underlying Index is fixed at 10. The Fund may hold more concentrated investment portfolio, leading to higher risks of volatility.
- The Fund is exposed to concentration risk by tracking a single region or country.
- The Fund is a FPI registered with the SEBI. SEBI's rules and limits on FPI shareholding in some Indian companies can change and may affect the Fund's performance. SEBI may also cancel the Fund's FPI registration under certain conditions. If this happens, the Fund may not be able to invest in, hold, or sell Indian securities. The Fund might need to sell all its Indian holdings quickly, possibly at a big loss.
- The base currency of the Fund is USD but the trading currency of the Fund is in HKD. The NAV of the Fund and its performance may be affected by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- Investment in Emerging Market, such as Indian market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

Source: MAGIHK, 30 Jun 2025. ¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. • Performance data has been calculated in USD including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is Mirae Asset AI Infrastructure V2 Index. Fund launch date: 7 February 2025. ² As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Listed Class of Shares of the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.68% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Index is a market capitalisation weighted, and a net total return index. It is designed to track the performance of companies involved in supporting the data center infrastructure requirements arising from artificial intelligence operations. This includes companies involved in the supply of electric utilities and infrastructure, energy management and optimization, data center equipment manufacturing, thermal management, and production and refinement of copper and uranium used to power and operate the artificial intelligence infrastructure. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. ⁴ Holdings are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Japan Global Leaders ETF (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the FactSet Japan Global Leaders Index. - The Underlying Index is reconstituted annually. Securities that no longer meet the eligibility criteria may remain in the index until the next scheduled annual reconstitution. The index's representativeness is not guaranteed to be optimised from time to time. - The Fund is exposed to concentration risk by tracking a single region or country. - The Japanese economy is heavily dependent on international trade and may be adversely affected by protectionist measures, competition from emerging economies, political tensions with its trading partners and their economic conditions, natural disasters and commodity prices. - The base currency of the Fund is JPY but the trading currency of the Fund is in HKD. The NAV of the Fund and its performance may be affected by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- We are witnessing a normalizing Japan economy after decades of deflations, as evidenced by simultaneous hikes in prices, wages, and rates.
- Japanese companies continue to deliver solid earnings growth in past quarters, while valuation is below historical average before Japan's exit from deflation, indicating undervaluation. TSE's capital market reform continue to bear fruits, enhancing listed companies quality and spurring shareholder returns. Potential household's shift away from cash and deposits in an inflationary economy also brings incremental flows to the equity market.
- Despite near term volatility caused by BOJ's rate hike and US Fed's rate cut, Japanese Yen remains at historical low level over past decades, supporting healthy exports by large Japanese corporates. Japan's export strength is also supported by high quality products, allowing Japanese corporates to capture high value-added parts in global supply chains.

Source: MAGIHK, 30 Junr 2025. ¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in JPY including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is FactSet Japan Global Leaders Index. Fund (listed class) launch date: 23 November 2023. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Units of the Fund over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.68% of the average Net Asset Value of the Listed Class of Units of the Fund. Any ongoing expenses exceeding 0.68% of the average Net Asset Value of the Listed Class of Units of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Underlying Index is a net total return, modified free float-adjusted market capitalisation weighted index. A net total return index reflects the reinvestment of dividends or coupon payments, after deduction of any withholding tax (including surcharges for special levies, if applicable). ⁴ Holdings are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X India Select Top 10 ETF (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Mirae Asset India Select Top 10 Index. - The number of constituents of the Underlying Index is fixed at 10. The Fund may hold more concentrated investment portfolio, leading to higher risks of volatility. - The Fund is exposed to concentration risk by tracking a single region or country. - The Fund is a FPI registered with the SEBI. SEBI's rules and limits on FPI shareholding in some Indian companies can change and may affect the Fund's performance. SEBI may also cancel the Fund's FPI registration under certain conditions. If this happens, the Fund may not be able to invest in, hold, or sell Indian securities. The Fund might need to sell all its Indian holdings quickly, possibly at a big loss. - The base currency of the Fund is USD but the trading currency of the Fund is in HKD. The NAV of the Fund and its performance may be affected by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls. - Investment in Emerging Market, such as Indian market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X India Sector Leader Active ETF (the "Fund") is to achieve long term capital growth by primarily investing in equities of exchange-listed companies globally, which fall within the investment theme of artificial intelligence and innovative technologies as detailed below. - The Fund does not seek to track any index or benchmark, it may fail to meet its objective as a result of the Manager's selection of investment, and/or the implementation of processes which may cause the Sub-Fund to underperform as compared to other index tracking funds with a similar objective. - The Fund is exposed to concentration risk by tracking a single region or country.
- The Fund is a FPI registered with the SEBI. SEBI's rules and limits on FPI shareholding in some Indian companies can change and may affect the Fund's performance. SEBI may also cancel the Fund's FPI registration under certain conditions. If this happens, the Fund may not be able to invest in, hold, or sell Indian securities. The Fund might need to sell all its Indian holdings quickly, possibly at a big loss. - The base currency of the Fund is USD but the trading currency of the Fund is in HKD. The NAV of the Fund and its performance may be affected by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls. Investment in Emerging Market, such as Indian market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- By region, it focuses on emerging opportunities in populous markets with younger demographics and greater growth potential, and it is also open to further investment in high-quality stocks within investable frontier markets.
- By theme, it capitalizes on investment opportunities in Asian companies that are pivotal to the global technology development ecosystem, including those involved in Artificial Intelligence.
- Investing in Emerging Asia, excluding China, helps mitigate geopolitical risks associated with investments and benefits from global companies' diversification efforts in their supply chains.

Global X Hang Seng High Dividend Yield ETF

3110 HKD

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Hang Seng High Dividend Yield ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Hang Seng High Dividend Yield Index. - Whether or not distributions will be made by the Fund is at the discretion of the Manager taking into account various factors and its own distribution policy. There can be no assurance that the distribution yield of the Fund is the same as that of the Index. - The Fund may invest in mid-sized companies, which may have lower liquidity and their prices are more volatile to adverse economic developments. - The Fund invests in the emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

FUND DETAILS¹

Stock Code	3110 (HKD)
ISIN	HK0000151933 (HKD)
Listing Date	17 Jun 2013
Ongoing Charges Over a Year ²	0.68%
Index ³	Hang Seng High Dividend Yield Index
Distribution Frequency	Semi-annually at the Manager's discretion (Mar and Sep) [#]
Board Lot Size	100 Units
Base Currency	HKD
Trading Currency	HKD counter: HKD
Exchange	HKEX

[#]The Manager may at its absolute discretion declare distributions semi-annually to unitholders in each financial year and details of the distribution declaration dates, distribution amounts and ex-dividend payment dates will be published on the Manager's website <https://www.globalxetfs.com.hk/>. Distributions may be made out of capital or income at the Manager's discretion. There can be no assurance that a distribution will be paid and dividend rate is not guaranteed. Positive distribution does not imply positive return. Please refer to the prospectus of the fund to understand the distribution policy and other details.

INVESTMENT POINTS

- Hang Seng High Dividend Yield Index is well positioned to benefit from increasing allocation from global investors amid global market volatility, and the potential dividend tax removal for southbound investors. Notably, this Index consists of over 55% of its constituents in State Owned Enterprises.
- High dividend strategy is also a key beneficiary for China's forceful stimulus package and policy supports. PBOC's Rmb300bn relending facility should boost corporate buyback, and Capital Market 'Nine Measures' issued by Central Government also promotes corporate dividend payout.
- Through investing in the Hang Seng High Dividend Yield Index, investors can gain exposure to high dividend-paying and low-volatility companies while also benefiting from the accelerated implementation of VCC.

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, Net Asset Value to Net Asset Value, with dividends (if any) reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in HKD including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown, there was insufficient data available in that year to provide performance. Fund (listed class) launch date: 11 June 2013. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges figure is an annualized figure based on the ongoing expenses of the Fund, expressed as a percentage of the Fund's average net asset value over the same period. The figure may vary from year to year. The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges of the Fund are fixed at 0.68% of the Fund's net asset value, which is equal to the current rate of the management fee of the Fund. For the avoidance of doubt, any ongoing expenses of the Fund exceeding the ongoing charges of the Fund (i.e. the management fee) shall be borne by the Manager and shall not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Underlying Index is net dividend yield weighted. At each index rebalancing, the weighting for each constituent is capped at 10%. The Underlying Index aims to reflect the overall performance of high-yield securities listed in Hong Kong. It comprises 50 constituents and its universe comprises all stocks and REITs that have their primary listings on the Hong Kong Exchanges and Clearing Limited ("HKEx"), excluding stocks that are secondary listings, preference shares, debt securities, mutual funds or other derivatives. A net total return index reflects the reinvestment of dividends or coupon payments, after deduction of any withholding tax (including any surcharges for special levies, if applicable). ⁴ Holdings are subject to change.

GLOBAL X HANG SENG HIGH DIVIDEND YIELD ETF

INDEX METHODOLOGY

1. Stocks are ranked by yield¹, and adjusted for one-off special dividend²

2. Stocks that exhibited high volatility and plummeted by more than 50% are screened out to avoid the "value" trap³

3. Top 50 yielding securities are weighted by yield, subject to a 10% capping

1. Securities will be ranked by net dividend yield and having at least three consecutive fiscal years. 2. If a security bears a net dividend yield of above 7%, its yield will be reviewed and recalculated to exclude one-off cash distributions, if any. 3. Top 25% of eligible securities with highest volatility are excluded. Securities whose price fell by more than 50% over the past 12 months are also screened out to avoid "value trap". Eligible securities should be large-cap or mid-cap constituents from Hang Seng Composite Index. Stocks are required to have an average daily turnover of at least HKD20m.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X HSCEI Components Covered Call Active ETF (the "Funds") is to generate income by primarily investing in constituent equity securities in the Hang Seng China Enterprises Index (the "Reference Index") and selling (i.e. "writing") call options on the Reference Indexes respectively to receive payments of money from the purchaser of call options (i.e. "premium").
- If the value of the securities relating to the Reference Index held by the Fund declines, the premium that the Fund received for writing the Reference Index Call Option may reduce such loss to some extent. However, the downside of adopting a covered call strategy is that the Fund's opportunity to profit from an increase in the level of the Reference Index is limited to the strike price of the Reference Index Call Option plus the premium received.
- The market value of an Reference Index Call Option may be affected by factors including supply and demand, interest rates. The Fund's ability to utilise Reference Index Call Options successfully will depend on the ability of the Manager to correctly predict future price fluctuations. If an Reference Index Call Option expires and if there is a decline in the market value of the Reference Index during the option period, the premiums received by the Fund from writing the Reference Index Call Options may not be sufficient to offset the loss realised.
- The Reference Index Call Options in the OTC markets may not be as liquid as exchange-listed options. The Fund may find the terms of counterparties in the OTC markets to be less favorable than the terms available for listed options. Moreover, the SEHK may suspend the trading of options in volatile markets which may cause the Fund unable to write Reference Index Call Options at times.
- The use of futures contracts involves market risk, volatility risk, leverage risk and negative roll yields and "contango" risk.
- Investing in Reference Index Futures and writing Reference Index Call Options generally involve the posting of margin. If the Fund is unable to meet its investment objective as a result of margin requirements imposed by the HKFE, the Fund may experience significant losses.
- The Fund employs an actively managed investment strategy. The Fund may fail to meet its objective as a result of the implementation of investment process which may cause the Fund to underperform as compared to direct investments in the constituent equity securities of the Reference Index.
- The Fund is exposed to concentration risk by tracking a specific regions or countries.
- To the extent that the constituent securities of Reference Index are concentrated in securities of a particular sector or market, the investments of it may be similarly concentrated.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- **Innovative Income Strategy**
Deliver appealing income with a monthly distribution plan (Monthly distribution is not guaranteed and may be from capital just in case)
- **Downside Protection**
Provide downside protection with option premium

Fund inception date: 28 February 2024. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.75% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.75% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Manager may at its absolute discretion declare distributions monthly to unitholders in each financial year and details of the distribution declaration dates, distribution amounts and ex-dividend payment dates will be published on the Manager's website <https://www.globalxetfs.com.hk/>. Distributions may be made out of capital or income at the Manager's discretion. There can be no assurance that a distribution will be paid and there is no guarantee as to the actual frequency and/or amount of dividend payments. Please note that a positive distribution yield does not imply a positive return on the total investment. Investors should not base investment decisions on the above information alone. Please refer to the Prospectus (including Product Key Facts Statement) for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. ⁴ Holdings are subject to change.

GLOBAL X HSCEI COMPONENTS COVERED CALL ACTIVE ETF

WHAT IS THE COVERED CALL STRATEGY?

Covered Call Strategy Payoff

Covered Call Features

- Generates higher income versus the underlying security itself due to the premiums received from selling call options.
- Upside potential is capped in the event that the stock appreciates beyond the strike price.
- Option premiums tend to increase during volatile markets, offering a potential risk management component.
- No additional downside protection beyond the premiums received.

Source: Mirae Asset, 2025

CASE STUDY

HSI COVERED CALL INDEX PERFORMANCE IN SPECIFIC TIME

1. Source: Hang Seng Indexes; Annualised Income yield has been over 10% for both HSI Covered Call index and HSCEI Covered Call Index since index inception in 24 Jun 2019. Index yield is not equivalent to yield/return of the fund. Positive yield does not mean positive return. Covered call writing can limit the upside potential of the underlying security. Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Fund and will reduce the capital available for future investment. Data as of 31 Jan 2024

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Hang Seng TECH Components Covered Call Active ETF (the "Funds") is to generate income by primarily investing in constituent equity securities in the Hang Seng TECH Index (the "Reference Index") and selling (i.e. "writing") call options on the Reference Indexes respectively to receive payments of money from the purchaser of call options (i.e. "premium").
- If the value of the securities relating to the Reference Index held by the Fund declines, the premium that the Fund received for writing the Reference Index Call Option may reduce such loss to some extent. However, the downside of adopting a covered call strategy is that the Fund's opportunity to profit from an increase in the level of the Reference Index is limited to the strike price of the Reference Index Call Options written, plus the premium received.
- The market value of an Reference Index Call Option may be affected by factors including supply and demand, interest rates. The Fund's ability to utilise Reference Index Call Options successfully will depend on the ability of the Manager to correctly predict future price fluctuations. If an Reference Index Call Option expires and if there is a decline in the market value of the Reference Index during the option period, the premiums received by the Fund from writing the Reference Index Call Options may not be sufficient to offset the loss realised.
- The Reference Index Call Options in the OTC markets may not be as liquid as exchange-listed options. The Fund may find the terms of counterparties in the OTC markets to be less favorable than the terms available for listed options. Moreover, the SEHK may suspend the trading of options in volatile markets which may cause the Fund unable to write Reference Index Call Options at times.
- The use of futures contracts involves market risk, volatility risk, leverage risk and negative roll yields and "contango" risk.
- Investing in Reference Index Futures and writing Reference Index Call Options generally involve the posting of margin. If the Fund is unable to meet its investment objective as a result of margin requirements imposed by the HKFE, the Fund may experience significant losses.
- The Fund employs an actively managed investment strategy. The Fund may fail to meet its objective as a result of the implementation of investment process which may cause the Fund to underperform as compared to direct investments in the constituent equity securities of the Reference Index.
- The Fund is exposed to concentration risk by tracking a specific regions or countries.
- To the extent that the constituent securities of Reference Index are concentrated in securities of a particular sector or market, the investments of it may be similarly concentrated.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- **Option Premium**
Covered Call Strategy based on Hang Seng Tech index offers higher option premium income as compared to that of other major indices due to higher volatility
- **Dividend**
ETF targets monthly distribution with option premium collected through monthly call option writing (Dividend rate is not guaranteed, distributions may be made out of capital)

Source: MAGIHK, 30 Jun 2025. ¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, Net Asset Value to Net Asset Value. These figures show by how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in USD including ongoing charges and excluding trading costs on SEHK you might have to pay. The Index of the Fund is Solactive Asia Pacific High Dividend Yield Index. Fund inception date: 13 Mar 2025. ²The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.75% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.75% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³The Manager may at its absolute discretion declare distributions monthly to unitholders in each financial year and details of the distribution declaration dates, distribution amounts and ex-dividend payment dates will be published on the Manager's website <https://www.globalxetfs.com.hk/>. Distributions may be made out of capital or income at the Manager's discretion. There can be no assurance that a distribution will be paid and there is no guarantee as to the actual frequency and/or amount of dividend payments. Please note that a positive distribution yield does not imply a positive return on the total investment. Investors should not base investment decisions on the above information alone. Please refer to the Prospectus (including Product Key Facts Statement) for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. ⁴Holdings are subject to change.

DIVIDEND PAYOUT SCHEDULE

Distribute dividends earned from the previous month (Dividend rate is not guaranteed, distributions may be made out of capital¹)

1. Positive distribution does not mean positive return. Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Fund and will reduce the capital available for future investment. For Illustration Purposes Only

Global X HSI Components Covered Call Active ETF

3419 HKD

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X HSI Components Covered Call Active ETF (the "Funds") is to generate income by primarily investing in constituent equity securities in the Hang Seng Index (the "Reference Index") and selling (i.e. "writing") call options on the Reference Indexes respectively to receive payments of money from the purchaser of call options (i.e. "premium"). - If the value of the securities relating to the Reference Index held by the Fund declines, the premium that the Fund received for writing the Reference Index Call Option may reduce such loss to some extent. However, the downside of adopting a covered call strategy is that the Fund's opportunity to profit from an increase in the level of the Reference Index is limited to the strike price of the Reference Index Call Options written, plus the premium received. - The market value of an Reference Index Call Option may be affected by factors including supply and demand, interest rates. The Fund's ability to utilise Reference Index Call Options successfully will depend on the ability of the Manager to correctly predict future price fluctuations. If an Reference Index Call Option expires and if there is a decline in the market value of the Reference Index during the option period, the premiums received by the Fund from writing the Reference Index Call Options may not be sufficient to offset the loss realised. - The Reference Index Call Options in the OTC markets may not be as liquid as exchange-listed options. The Fund may find the terms of counterparties in the OTC markets to be less favorable than the terms available for listed options. Moreover, the SEHK may suspend the trading of options in volatile markets which may cause the Fund unable to write Reference Index Call Options at times. - The use of futures contracts involves market risk, volatility risk, leverage risk and negative roll yields and "contango" risk. - Investing in Reference Index Futures and writing Reference Index Call Options generally involve the posting of margin. If the Fund is unable to meet its investment objective as a result of margin requirements imposed by the HKFE, the Fund may experience significant losses. - The Fund employs an actively managed investment strategy. The Fund may fail to meet its objective as a result of the implementation of investment process which may cause the Fund to underperform as compared to direct investments in the constituent equity securities of the Reference Index. - To the extent that the constituent securities of Reference Index are concentrated in securities of a particular sector or market, the investments of it may be similarly concentrated. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- **Innovative Income Strategy**
Deliver appealing income with a monthly distribution plan (Monthly distribution is not guaranteed and may be from capital just in case)
- **Downside Protection**
Provide downside protection with option premium

GLOBAL X HSI COMPONENTS COVERED CALL ACTIVE ETF

WHAT IS THE COVERED CALL STRATEGY?

Covered Call Strategy Payoff

Covered Call Features

- Generates higher income versus the underlying security itself due to the premiums received from selling call options.
- Upside potential is capped in the event that the stock appreciates beyond the strike price.
- Option premiums tend to increase during volatile markets, offering a potential risk management component.
- No additional downside protection beyond the premiums received.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X FTSE China Policy Bank Bond ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the FTSE Chinese Policy Bank Bond Index. - The Fund is exposed to concentration risk by tracking a specific regions or countries. - The base currency of the Fund is RMB but the Units are traded in HKD. RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non-RMB based investors are exposed to foreign exchange risk. - Investing in the PRC inter-bank bond market via the Foreign Access Regime and/or the Bond Connect is subject to regulatory risks and various risks such as volatility risk, liquidity risk, settlement and counterparty risk as well as other risk factors typically applicable to fixed income securities. The relevant rules and regulations of the Foreign Access Regime and the Bond Connect are subject to change which may have potential retrospective effect. If a counterparty defaults in delivering securities, the trade may be cancelled which may adversely affect the value of the Fund. - The Fund invests in the emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

Global X Asia USD Investment Grade Bond ETF

3075 HKD
9075 USD

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

- Global X Asia USD Investment Grade Bond ETF's (the "Fund's") objective is to provide investment results that, before fees and expenses, closely correspond to the performance of the Bloomberg Asia ex Japan USD Investment Grade Bond Index (the "Index"). - The Index is a new index. The Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Index. The Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history. - The base currency of the Fund is USD but the trading currencies of the Fund are in HKD and USD. The Net Asset Value of the Fund and its performance may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls. - Investing in the Fund may expose to risks including credit / counterparty risk, interest rate risk, volatility and liquidity risk, downgrading risk, sovereign debt risk, valuation risk, credit ratings risk. - The Index is subject to concentration risk as a result of tracking the performance of bonds in the Asian (excluding Japanese) market. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting Asia. - The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. - As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests. - Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Fund and will reduce the capital available for future investment. - The trading price of the Fund's unit (the "Unit") on the Stock Exchange of Hong Kong is driven by market factors such as demand and supply of the Unit. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- Global X USD Money Market ETF's (the "Fund's") objective is to invest in short term deposits and high quality money market investments. The Fund seeks to achieve a return in USD in line with prevailing money market rate. - The purchase of a Unit in the Fund is not the same as placing funds on deposit with a bank or deposit-taking company. The Fund does not guarantee principal and the Manager has no obligation to realise the Units at the offer value. The Fund does not have a constant NAV. The Fund is not subject to the supervision of the Hong Kong Monetary Authority. - The Fund employs an actively managed investment strategy. It may fail to meet its objective as a result of the Manager's selection of investments, and/or the implementation of processes which may cause the Fund to underperform as compared to prevailing money market rates or other money market funds with a similar objective. - The Fund seeks to achieve a return in USD in line with prevailing money market rates. The factors influencing interest rates, and in turn the performance of money market instruments include, amongst other things, monetary policy, fiscal policy and inflation. If the prevailing money market rates become negative, the Fund will suffer a loss. Moreover, if prevailing interest rate is at a low level, the Fund may also produce a negative return over a given period of time, as ongoing charges of the Fund may be higher than the interests received by the Fund. - Risks associated with short-term debt securities / money market instruments include Short-term debt instruments risk, Credit / Counterparty risk, Interest rate risk, Sovereign debt risk, Credit rating risk, Credit rating agency risk, Downgrading risk and Valuation risk. - The Fund will invest primarily in USD-denominated and settled short-term deposits, high quality money market instruments (including debt securities). The Fund is therefore likely to be more volatile than a broad-based fund that adopts a more diversified strategy. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the USD market. - Investors of Listed and Unlisted Classes of Units are subject to different pricing, trading hours in the secondary market, dealing deadlines and dealing arrangements. In a stressed market scenario, investors of the Unlisted Classes of Units could realise their Units at NAV while investors of the Listed Class of Units in the secondary market could only realise at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. - For Listed Class of Units, the transaction fee and the duties and charges in respect of creation and realisation applications are paid by the participating dealer applying for or realising such units and/or the Manager. Investors of Listed Class of Units in the secondary market may bear other fees, such as SEHK trading fees. On the other hand, investors of Unlisted Class of Units may be subject to a subscription fee and realisation fee respectively. Any or all of these factors may lead to a difference in the NAV of the Listed Class of Units and Unlisted Class of Units. - Underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund. - The trading price of the Fund unit on the Stock Exchange of Hong Kong is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Fund's net asset value. - Payments of distributions out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions involving payment of dividends out of capital or effectively out of capital of the Fund may result in an immediate reduction in the NAV per Unit of the Fund and will reduce the capital available for the Fund's future investment

INVESTMENT POINTS

- Attractive yields with high credit quality[#]
- The lowest fees within the same product category^{*}
- Intraday tradability with no lock up period

[#]Source: Mirae Asset, 31 Mar 2024. The Manager may, at its discretion, pay distributions out of capital or effectively out of capital as well as income at the Manager's discretion. Any distributions involving payment of distributions out of capital or effectively out of capital of the Global X USD Money Market ETF may result in an immediate reduction in the Net Asset Value of the Global X USD Money Market ETF. Positive distribution yield does not imply a positive return. Please refer to the IMPORTANT INFORMATION section above and the Fund's prospectus for further details.

9440 USD

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X US Treasury 0-3 Mth ETF (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the ICE 0-3 Month US Treasury Bill Index (the "Index"). - The Fund is exposed to the Credit/Default risk of issuers of the fixed income securities that the Fund may invest in; the Credit Rating risk that Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times; the Interest Rate risk that the prices of fixed income securities rise when interest rates fall, whilst their prices fall when interest rates rise; the Downgrading risk that the Manager may or may not be able to dispose of the fixed income securities that are being downgraded; the Sovereign Debt risk that the Fund's investment in US Treasury securities may be exposed to political, social and economic risks; the Valuation risk that the Fund's investments may involve uncertainties and judgemental determinations. If such valuation turns out to be incorrect, this may affect the Net Asset Value calculation of the Fund. - The Index is a new index. The Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Index. The Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history. -The Index is subject to concentration risk as a result of tracking the performance of a single geographical region, namely the United States, and is concentrated in debt securities of a single issuer, namely the US Treasury. The Fund's value may be more volatile than that of a fund having a more diverse portfolio and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the United States market. - The base currency of the Fund is USD but one of the trading currencies of the Fund is in HKD. The Net Asset Value of the Fund and its performance may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls. - The borrower may fail to return the securities in a timely manner or at all. The Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from redemption requests. As part of the securities lending transactions, the Fund must receive cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. - The trading price of the Shares on the SEHK is driven by market factors such as the demand and supply of the Shares. Therefore, the Shares may trade at a substantial premium or discount to the Fund's Net Asset Value. - Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Fund and will reduce the capital available for future investment.

FUND DETAILS¹

INVESTMENT POINTS

- Build Resilience with U.S. Treasuries**
The underlying assets of the Global X US Treasury 0-3 Month ETF are US Treasury Bills with AAA ratings, making them less susceptible to interest rate fluctuations, resulting in higher quality and lower volatility.
- High Convenience**
Access U.S. Treasuries through our ETF during Hong Kong local trading hours
- Tax Efficiency**
Hong Kong Investors investing in HK-listed US Treasury Bond ETFs are not subject to dividend tax

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in USD including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is ICE 0-3 Month US Treasury Bill Index. Fund launch date: 12 December 2024. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. As the Fund is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value of the Listed Class of Shares over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Listed Class of Shares of the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.06% of the average Net Asset Value of the Listed Class of Shares of the Fund. Any ongoing expenses exceeding 0.06% of the average Net Asset Value of the Listed Class of Shares of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Manager may at its absolute discretion declare distributions quarterly to unitholders in each financial year and details of the distribution declaration dates, distribution amounts and ex-dividend payment dates will be published on the Manager's website <https://www.globalxetfs.com.hk/>. Distributions may be made out of capital or income at the Manager's discretion. There can be no assurance that a distribution will be paid and dividend rate is not guaranteed. Please refer to the prospectus of the Fund to understand the distribution policy and other details. Please note that a positive distribution does not imply a positive return on the total investment. Investors should not base investment decisions on the above information alone. Please refer to the Prospectus(including Product Key Facts Statement) for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance.

INDEX METHODOLOGY – ICE 0-3 MONTH US TREASURY BILL INDEX (GTBS)

1 Security Selection Criteria

- US Treasury Bills with maturities less than or equal to three months.
- Minimum amount outstanding \$1 billion in USD.
- Inflation-linked debt and strips are excluded from the Index.

2 Security Selection Process

- All bonds meeting the index component requirements are eligible for inclusion on selection day. Rule-based with no discretion from the index administrator.
- Current components are evaluated on each selection day to ensure they still meet the requirements.

3 Weighting Scheme

- Index constituents are market capitalization weighted.
- Total allocation to an individual constituent does not exceed 25%.

4 Rebalance/Reviews

- Cash flows from bill redemptions are reinvested in the index at the point of maturity.
- Ordinary rebalance occurs on the rebalance day after close of business to reflect the new selection of index components determined on selection day.
- Extraordinary rebalance is not performed.

Source: ICE, as of 31 Oct 2024

KEY CHARACTERISTICS OF TREASURY BILLS, NOTES, AND BONDS

- U.S. Treasuries are debt securities issued by the U.S. government, utilized by investors as a low-risk, income-generating investment option to provide diversification and stability to an investment portfolio during uncertain market conditions
- They serve as a benchmark for fixed income investments and are often used as a relatively stable investment during times of market volatility or economic uncertainty

Bills

Treasury bills (T-bills) are short-term debt securities with a maturity of one year or less, issued at a discount to face value, and pay no interest until maturity.

Notes

Treasury notes (T-notes) are medium-term debt securities with maturities ranging from 2 to 10 years, pay semi-annual interest payments, and are sold at face value.

Bonds

Treasury bonds (T-bonds) are long-term debt securities with maturities ranging from 10 to 30 years, pay semi-annual interest payments, and are sold at face value.

HOW TO USE UST BILLS ETF IN A PORTFOLIO

Cash Alternative

There are any number of reasons that cash is needed in an portfolio, including if investors are seeking an attractive entry point. It offers a way to potentially increase yield rather than leaving cash in the account.

Tactical Allocation

Cash can build up in portfolios between rebalances, and a tactical allocation to UST Bills ETF can help reduce cash drag and potentially increase a portfolio's yield.

Lower Portfolio Duration

It rebalances each month with weighted average maturity at 40 days. This creates a low-duration holding that investors can strategically allocate to in an effort to reduce interest rate risk.

UST Bills ETF can be added to the short duration end of a barbell strategy. As a short to medium duration fund, it can allow investors to look farther out on the long duration end of the strategy without taking on additional interest rate risk.

Global X
US Treasury 3-5 Year ETF

3450 HKD
9450 USD

IMPORTANT INFORMATION

Investors should not base investment decisions on this website alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X US Treasury 3-5 Year ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Mirae Asset US Treasury 3-5 Year Index (the "Underlying Index").
- The Fund is exposed to the Credit/Default risk of issuers of the debt securities that the Fund may invest in; the Credit Rating risk that the credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times; the Downgrading risk that the Manager may or may not be able to dispose of the debt securities that are being downgraded; the Interest rate risk that the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise; the Policy risk that the changes in macro-economic policies in the US may have an influence over the US' capital markets and affect the pricing of the bonds in the Fund's portfolio, which may in turn adversely affect the return of the Fund; the Sovereign debt risk that the Fund's investment in US Treasury securities may be exposed to political, social and economic risks that the Fund may suffer significant losses when there is a default of the US Treasury; the valuation risk that the valuation of the Fund's instruments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the Net Asset Value calculation of the Fund.
- The Underlying Index is a new index. The Underlying Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Underlying Index. The Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.
- The Underlying Index is subject to concentration risk as a result of tracking the performance of a single geographical region, namely the US, and is concentrated in debt securities of a single issuer, namely the US Treasury. The Fund's value may be more volatile than that of a fund having a more diverse portfolio and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the US market.
- The base currency of the Fund is USD but the trading currency of the Fund is in HKD. The Net Asset Value of the Fund and its performance may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- The borrower may fail to return the securities lent out in a timely manner or at all. The Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests. As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the collateral, adverse market movements in the collateral value or change of value of securities lent. This may cause significant losses to the Fund.
- The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Fund's Net Asset Value.
- Payments of distributions out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions involving payment of distributions out of capital or effectively out of capital of the Fund may result in an immediate reduction in the Net Asset Value per Unit of the Fund and will reduce the capital available for future investment.

INVESTMENT POINTS

- US Treasury yield at historical high level since GFC, offering compelling risk-free returns
- Intermediate term US Treasury Bond offers a balanced choice between income and protection
- Hong Kong Investors investing in HK-listed US Treasury Bond ETFs are not subject to dividend tax

Global X Bloomberg MSCI Asia Ex Japan Green Bond ETF

3059 HKD
83059 RMB

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Bloomberg MSCI Asia ex Japan Green Bond ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Bloomberg MSCI Asia ex Japan USD Green Bond Index. - The Fund is exposed to concentration risk by tracking a specific regions or countries. - The Fund's investments may be concentrated in Green Bonds. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments. The use of the GBP-based selection criteria in the construction of the Index and the adoption of the Green Bond investment strategy of the Fund may result in the Fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities when it might be disadvantageous to do so. This may adversely affect the Fund's investment performance and, as such, the Fund may perform differently compared to similar funds that do not use such criteria. - The Fund invests in the emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

Where no past performance is shown, there was insufficient data available in that year to provide performance. The Index of the Fund is Bloomberg MSCI Asia ex Japan USD Green Bond Index. Fund inception date: 18 August 2022. ² The Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Fund to cover all of the costs, fees and expenses of the Fund. The ongoing charges figure is an annualised figure based on the ongoing expenses of the Fund, expressed as a percentage of the Fund's average Net Asset Value of the Listed Class of Units of the Fund over the same period. It may be different upon actual operation of the Fund and may vary from year to year. As the Fund adopts a single management fee structure, the estimated ongoing charges of the Fund will be equal to the amount of the single management fee, which is capped at 0.40% of the average Net Asset Value of the Fund. Any ongoing expenses exceeding 0.40% of the average Net Asset Value of the Fund will be borne by the Manager and will not be charged to the Fund. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Manager may at its absolute discretion declare distributions semi-annually to unitholders in each financial year and details of the distribution declaration dates, distribution amounts and ex-dividend payment dates will be published on the Manager's website <https://www.globalxetfs.com.hk/>. Distributions may be made out of capital or income at the Manager's discretion. There can be no assurance that a distribution will be paid and dividend rate is not guaranteed. Please refer to the prospectus of the Fund to understand the distribution policy and other details. The annualized yield is calculated as follows: (dividends per share distributed in Sep 2024 and Mar 2025) / net asset value per unit of the fund on cut-off day, i.e. 7 Feb 2025. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. Please note that a positive distribution yield does not imply a positive return on the total investment. Investors should not base investment decisions on the above information alone. Please refer to the Prospectus (including Product Key Facts Statement) for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. ⁴ Issuers are subject to change.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Hang Seng TECH ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Hang Seng TECH Index. - The Fund is exposed to concentration risk by tracking a specific regions or countries. - The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio. - The Fund's investments are concentrated in companies with a technology theme. Technology companies are often characterised by relatively higher volatility in price performance. Companies in the technology sector also face intense competition, and there may also be substantial government intervention, which may have an adverse effect on profit margins. These companies are also subject to the risks of loss or impairment of intellectual property rights or licences, cyber security risks resulting in undesirable legal, financial, operational and reputational consequences. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- The ETF invests in 30 renowned Chinese internet platforms, consumer tech companies (Smartphone, PC), and other high-tech companies (EV, Semiconductor) that rank among the top choices for global investors seeking opportunities in the Chinese market.
- Riding on technology development: With well-established ecosystem containing large user base and leading technology in place, we see further upside potential for these leading technology companies coming from the rapid development of structural growth themes such as EV and AI in China.
- Undemanding valuation: Even after market rally, HS Tech still trades at below historical average valuation. China internet companies still trade at a deep discount to US peers.
- Ramping up shareholder returns: Major internet platforms generate solid free cash flow, and they are proactively returning excess cash to investors through share repurchase and cash dividend.
- Sectors including ecommerce, advertising, EV, and 3C electronics are key beneficiaries of revived consumer sentiments under policy stimulus in China.

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X Hang Seng ESG ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the HSI ESG Enhanced Index. - The Fund is exposed to concentration risk by tracking a specific regions or countries. - The Fund's investments may be concentrated in companies with a greater ESG focus and thus its value may be more volatile than that of a fund with having a more diverse portfolio of investments. In addition, there is a lack of standardised taxonomy in relation to ESG investing strategies. The standard of disclosure adopted by funds in relation to the relevant ESG factors or principles may vary. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT POINTS

- Global X Hang Seng ESG ETF applies a rules-based ESG tilting and exclusion methodology to the Hang Seng Index to reduce the Index ESG Risk Rating and carbon intensity
- The Fund employs research and data from globally leading ESG research companies to assess constituents' sustainability profiles and to implement a 3-step exclusion methodology to screen out constituents with the highest ESG risk ratings, breach the United Nations Global Compact Principles or are involved in controversial products
- In a single trade, the Fund delivers access to dozens of Hong Kong's most sustainable companies at a single management fee of 0.29%

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X MSCI China ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the MSCI China Index. - The Fund is exposed to concentration risk by tracking a specific region or countries. - Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility. - The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected. - Listed companies on the ChiNext market and/or STAR Board are usually subject to higher fluctuation in stock prices and liquidity risks, over-valuation risk, differences in regulation, delisting risk, and concentration risk. - There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Fund's investments in Mainland China. Any increased tax liabilities on the Fund may adversely affect the Fund's value. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value. - Dividend distributions are not guaranteed, and therefore, investors may not receive any dividends from the Fund. - The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

FUND DETAILS¹

Stock Code	3040 (HKD) 9040 (USD)

Trading Currency	HKD counter: HKD USD counter: USD
Exchange	HKEX

INVESTMENT POINTS

- All China Exposure: Enable investors to access a basket of over 600 China securities listed in Hong Kong, China A and others via a single trade.
- Unprecedented monetary and fiscal policy stimulus combo launched at end September substantially elevated market sentiments. Further policy (consumption, property, and capital market related) roll out and execution could support real economy recovery.
- Undemanding valuation: Despite recent rally, MSCI China still trades at a discount to other EM markets.
- Major internet platforms delivers solid earnings through cost optimization and quality-focused growth strategy. With the solid free cash flow generated by their core business, major internet platforms are proactively returning excess cash to investors through share repurchase and cash dividend.
- EV sales momentum remains strong in China, with EV penetration close to 50%. Improving Supply-demand dynamics in Battery sector will also support a recovery in capacity utilization rates.

Global X FTSE Greater China ETF

3470 HKD

IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X FTSE Greater China ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the FTSE MPF Greater China Index.
- The Fund is exposed to concentration risk by tracking a specific regions or countries.
- Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected.
- Listed companies on the ChiNext market and/or STAR Board are usually subject to higher fluctuation in stock prices and liquidity risks, over-valuation risk, differences in regulation, delisting risk, and concentration risk.
- There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Fund's investments in Mainland China. Any increased tax liabilities on the Fund may adversely affect the Fund's value.
- The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X S&P Crude Oil Futures Enhanced ER ETF (the "Fund") is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the S&P GSCI Crude Oil Enhanced Index Excess Return. - As the exposure of the Fund is concentrated in the crude oil market, it is more susceptible to the effects of crude oil price volatility than more diversified funds. - Crude oil prices are highly volatile and may fluctuate widely and may be affected by numerous events or factors such as crude oil production and sale, complex interaction of supply and demand of crude oil, weather, crude oil inventory level, war, speculator's activities, Organization of the Petroleum Exporting Countries' behaviour and control, economic activity of significant crude oil use country and other financial market factors. - The exposure of the Fund is concentrated in the crude oil market, it is more susceptible to the effects of crude oil price volatility than more diversified funds. - Investment in futures contracts involves specific risks such as high volatility, leverage, rollover and margin risks. - The trading price of the Fund's unit on the SEHK is driven by secondary market trading factors, which may lead to a substantial premium or discount to the Fund's net asset value.

FUND DETAILS¹

Stock Code	3097 (HKD)
ISIN	HK0000296944 (HKD)
Listing Date	16 Jun 2016
Ongoing Charges Over a Year ²	3.00%
Index ³	S&P GSCI Crude Oil Enhanced Index Excess Return
Board Lot Size	500 Units
Base Currency	HKD
Trading Currency	HKD counter: HKD
Exchange	HKEX

INVESTMENT POINTS

- Crude Oil serves as an effective hedge against inflation, providing investors with flexibility in a potentially more persistent high-inflation environment
- Crude Oil demonstrated low historical correlation with major asset classes, offering portfolio diversification for investors
- Uncertainty around tariff and counter-tariff continue to weigh on Global economy, creating oil demand uncertainty. However, geopolitical risks are on the rise again, potentially affecting crude oil supply. Historical low level of oil/gold price ratio could also provide price support for crude oil

Source: MAGIHK, 30 Jun 2025. ¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Sub-Fund increased or decreased in value during the calendar year shown.

• Performance data has been calculated in HKD including ongoing charges and excluding trading costs on HKEx you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. The Index of the Fund is S&P GSCI Crude Oil Enhanced Index Excess Return. Fund inception date: 14 Jun 2016. ² The ongoing charges figure is an estimated annualised figure based on actual expenses incurred for the period from 1 April 2025 to 30 May 2025, expressed as a percentage of the Fund's average Net Asset Value over the same period. The figure may vary from year to year. It includes the amortised portion of the set-up costs of the Fund applicable to the relevant period but excludes any extraordinary expenses. The ongoing charges figure has been capped at a maximum of 3% of the average Net Asset Value of the Fund. Any ongoing expenses of the Fund will be borne by the Manager and will not be charged to the Fund if such expense would result in the ongoing charges figure exceeding 3%. An increase or removal of the cap is subject to one month's prior written notice to Unitholders. Please refer to the Product Key Facts and the Prospectus for further details. ³ The Underlying Index is an excess return index. An excess return index (and not a total return) reflects the positive or negative return of the underlying WTI Futures Contracts price movements only (and not any notional interest earnings). ⁴ Holdings are subject to change
