Global X India Select Top 10
ETFCategory: Thematic Growth
As of 27/02/2026

IMPORTANT INFORMATION

Investors should not base investment decisions on this document alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of principal. Investors should note:

- Global X India Select Top 10 ETF (the "Fund") seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Mirae Asset India Select Top 10 Index (the "Underlying Index").
- The Underlying Index is a new index. The Underlying Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Underlying Index. The Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history. The Underlying Index is an equal weighted index whereby the Underlying Index constituents will have the same weighting at each rebalancing (but not between each rebalancing) regardless of its size or market capitalisation based on the methodology of the Underlying Index.
- The Fund is a FPI registered with the SEBI. The applicable laws, rules and guidelines on FPI impose limits on the ability of FPI to acquire shares in certain Indian issuers from time to time and are subject to change. This may also adversely affect the performance of the Fund. The FPI status of the Fund may be revoked by the SEBI under certain circumstances. In the event the Fund's registration as a FPI is canceled, revoked, terminated or not renewed, this would adversely impact the ability of the Fund to make further investments, or to hold and dispose of existing investment in Indian securities. The Fund may be required to liquidate all holdings in Indian securities acquired by the Fund as a FPI. Such liquidation may have to be undertaken at a substantial discount and the Fund may suffer significant substantial losses.
- The Fund's investments are concentrated in securities in India. The Fund's value may be more volatile than that of a fund with a more diverse portfolio. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Indian market.
- The Fund's investments are concentrated in companies in various sectors and themes including communication services, information technology, financials, health care, consumer staples and consumer discretionary, industrials and energy. Fluctuations in the business for companies in these sectors or themes will have an adverse impact on the Net Asset Value of the Fund.
- The number of constituents of the Underlying Index is fixed at 10. The Fund by tracking the Underlying Index may have a more concentrated investment portfolio than it would have held if tracking an index with a higher number of constituents, leading to higher risks of volatility.
- High market volatility and potential settlement difficulties in the equity market in India may result in significant fluctuations in the prices of the securities traded on such market and thereby may adversely affect the value of the Fund. The BSE has the right to suspend trading in any security traded thereon. The Indian government or the regulators in India may also implement policies that may affect the Indian financial markets. There may also be difficulty in obtaining information on Indian companies as disclosure and regulatory standards in India are less stringent than those of developed countries.
- The taxation of income and capital gains in India is subject to the fiscal law of India. The tax rate in respect of capital gains derived by a FPI on transfer of securities will vary depending upon various factors. Any increased tax liabilities on the Fund may adversely affect the Net Asset Value of the Fund. Any shortfall between the provision and the actual tax liabilities, which will be debited from the assets of the Fund, will adversely affect its Net Asset Value. For details, please refer to the section headed "Taxation in India" in the Prospectus.
- Underlying investments of the Fund may be denominated in currencies other than the base currency of the Fund. In addition, the base currency of the Fund is USD but the trading currency of the Fund is in HKD. The Net Asset Value of the Fund and its performance may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from redemption requests.
- The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Fund's Net Asset Value.
- Payments of distributions out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions involving payment of dividends out of capital or effectively out of capital of the Fund may result in an immediate reduction in the Net Asset Value per Unit of the Fund and will reduce the capital available for future investment.

INVESTMENT OBJECTIVES

The Fund seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Mirae Asset India Select Top 10 Index (the "Underlying Index").
