IMPORTANT INFORMATION

Investors should not base investment decisions on this material alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. Past performance is not indicative of future performance. There is no guarantee of the repayment of the principal. Investors should note:

- The investment objective of Global X China Core TECH ETF's (the "Fund") is to provide investment results that, before fees and expenses, closely correspond to the performance of the Mirae Asset China Tech Top 30 Index.
- The Fund is exposed to concentration risk by tracking a single region or country. It is potentially more volatile than a broad-based fund due to adverse conditions in the region.
- The Index constituents may be concentrated in a specific industry or sector, which may potentially more volatile than a fund with a diversified portfolio.
- The Fund may be exposed to risks associated with different technology sectors and themes. A downturn in these sectors or themes may have adverse effects on the Fund.
- Investment in Emerging Market, such as A-share market, may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected.
- Listed companies on the ChiNext market and/or STAR Board are usually subject to higher fluctuation in stock prices and liquidity risks, over-valuation risk, differences in regulation, delisting risk, and concentration risk.
- There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Fund's investments in Mainland China. Any increased tax liabilities on the Fund may adversely affect the Fund's value.
- The trading price of the Fund's unit (the "Unit") on the SEHK is driven by secondary market trading factors. The Units may trade at a substantial premium or discount to the Fund's net asset value.
- The Manager may at its discretion pay dividends out of the capital of the Fund. Distributions paid out of capital, represent a return of an investor's original investment or its gains and may potentially reduce the Fund's Net Asset Value per Share as well as the capital available for future investment.
- The Fund may suffer from a losses or delays when recovering the securities lent out. This may potentially affect its ability to meet payment and redemption obligations. Collateral shortfalls due to inaccurate pricing or change of value of securities lent, may cause significant losses to the Fund.

INVESTMENT OBJECTIVES

The Fund is a passive ETF and seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Mirae Asset China Tech Top 30 Index NTR (the "Index").
