

PRODUCT KEY FACTS

**Global X Exchange Traded Funds Series OFC -
Global X K-pop and Culture ETF (Listed Class)
30 April 2026**

Issuer: Mirae Asset Global Investments (Hong Kong) Limited

- **This is a passive exchange traded fund.**
- **This statement provides you with key information about this product.**
- **This statement is a part of the Prospectus.**
- **You should not invest in this product based on this statement alone.**

Quick facts

Stock code:	3158
Trade lot size:	50 Shares
Manager:	Mirae Asset Global Investments (Hong Kong) Limited
Custodian:	Cititrust Limited
Administrator:	Citibank, N.A., Hong Kong Branch
Ongoing charges over a year*:	0.68%
Tracking difference of the last calendar year[^]:	-0.80%
Underlying Index:	Solactive K-pop and Culture Index
Base currency:	Korean won (KRW)
Trading currency:	Hong Kong dollar (HKD) only
Financial year end of the Sub-Fund:	31 March
Distribution policy:	Annually (usually in May of each year) at the Manager's discretion. Distributions may be paid out of capital or effectively out of capital, but may not be so paid if the cost of the Sub-Fund's operations is higher than the return from management of the Sub-Fund's cash and holdings of investment products. Distributions on any Shares will be in HKD only.
ETF Website[#]:	https://www.globalxetfs.com.hk/

* The ongoing charges figure is an annualised figure based on the ongoing expenses of the Sub-Fund, expressed as a percentage of the Sub-Fund's average Net Asset Value (as defined below) of the Listed Class of Shares (as defined below) of the Sub-Fund over the same period. The figure may vary from year to year. The Sub-Fund adopts a single management fee structure, whereby a single flat fee will be paid out of the assets of the Sub-Fund to cover all of the costs, fees and expenses of the Sub-Fund. The ongoing charges of the Sub-Fund are fixed at 0.68% of the Sub-Fund's Net Asset Value of the Listed Class of Shares of the Sub-Fund, which is equal to the current rate of the management fee of the Listed Class of Shares of the Sub-Fund. For the avoidance of doubt, any ongoing expenses of the Sub-Fund exceeding the ongoing charges of the Sub-Fund (i.e. the management fee) shall be borne by the Manager and shall not be charged to the Sub-Fund. Please refer to the below section headed "Ongoing fees payable by the Sub-Fund" and the Prospectus for further details.

[^] This is the actual tracking difference of the calendar year ended 31 December 2025. Investors should refer to the Sub-Fund's website for more up-to-date information on actual tracking difference.

[#] This website has not been reviewed or approved by the Securities and Futures Commission (the "SFC").

What is this product?

- Global X K-pop and Culture ETF (the "Sub-Fund") is a sub-fund of the Global X Exchange Traded Funds Series OFC (the "Company"), which is a public umbrella open-ended fund company established under Hong Kong law with variable capital with limited liability and segregated liability between sub-funds. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "Code").
- **The Sub-Fund offers both listed class of Shares (the "Listed Class of Shares") and unlisted classes of Shares (the "Unlisted Classes of Shares"). This statement contains information about the offering of the Listed Class of Shares, and unless otherwise specified, references to "Shares" in this statement shall refer to the "Listed**

Class of Shares". Investors should refer to a separate statement for the offering of the Unlisted Classes of Shares.

Objective and investment strategy

Objective

The investment objective of the Sub-Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the Solactive K-pop and Culture Index (the "Index").

Strategy

In seeking to achieve the Sub-Fund's investment objective, the Manager will primarily use a full replication strategy through investing directly in constituent stocks of the Index in substantially the same weightings in which they are included in the Index (the "Replication Strategy").

Where the adoption of the Replication Strategy is not efficient or practicable or where the Manager considers appropriate in its absolute discretion, the Manager may pursue a representative sampling strategy and hold a representative sample of the constituent securities of the Index selected by the Manager using rule-based quantitative analytical models to derive a portfolio sample (the "Representative Sampling Strategy"). In pursuing the Representative Sampling Strategy, the Manager may cause the Sub-Fund to deviate from the Index weighting on the condition that the maximum deviation from the Index weighting of any constituent will not exceed 3 percentage points above or below such weighting.

Investors should note that the Manager may switch between the Replication Strategy and the Representative Sampling Strategy without prior notice to investors, in its absolute discretion as often as it believes appropriate in order to achieve the investment objective of the Sub-Fund by tracking the Index as closely (or efficiently) as possible for the benefit of investors.

The Manager may invest no more than 10% of the Sub-Fund's net asset value (the "Net Asset Value") in futures for investment and hedging purposes, where the Manager believes such investments will help the Sub-Fund achieve its investment objective and are beneficial to the Sub-Fund. The futures in which the Sub-Fund may invest will be index futures which exhibit high correlation with the Index in order to manage the Sub-Fund's exposure to the Index constituents, such as KOSPI 200 Index futures.

The Sub-Fund may also invest no more than 10% of its Net Asset Value in cash and money market funds which are authorised under Chapter 8.2 of the Code or eligible schemes under Chapter 7.11A of the Code for cash management purpose.

Currently, the Sub-Fund will not enter into sale and repurchase transactions, reverse repurchase transactions or other similar over-the-counter transactions. The Manager will seek the prior approval of the SFC (if required), and provide at least one month's prior notice to Shareholders before the Manager engages in any such investments.

The Manager may, on behalf of the Sub-Fund, enter into securities lending transactions to a maximum level of up to 50% and expected level of approximately 20% of the Sub-Fund's Net Asset Value.

As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the value of the securities lent (interests, dividends and other eventual rights included) valued on a daily basis. The collateral will be marked-to-market on a daily basis and will be subject to safekeeping by the Custodian or an agent appointed by the Custodian. Non-cash collateral received may not be sold, re-invested or pledged. Any re-investment of cash collateral received shall be subject to the requirements as set out in the Code. To the extent the Sub-Fund undertakes securities lending transactions, all revenues (net of direct and indirect expenses as reasonable and normal compensation for the services rendered by the Manager, a securities lending agent and/or other service providers in the context of such transactions to the extent permitted by applicable legal and regulatory requirements) shall be returned to the Sub-Fund.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Part 1 of the Prospectus.

Index

The Index is a net total return, modified free float-adjusted market capitalisation weighted index which aims to track the performance of South Korean companies that represent key economic industries associated with the global popularity of Korean culture. Free float-adjusted market capitalisation means that, in determining the market capitalisation of a company, only shares readily available in the market rather than all of the company's issued shares are taken into account (i.e. the share price of the company multiplied by the number of shares readily available in the market). Each constituent in the Index, being a modified free float-adjusted market capitalisation weighted index, will be assigned a weight according to their free float-adjusted market capitalisation as modified by the Index Category Caps (as defined below).

**Global X Exchange Traded Funds Series OFC -
Global X K-pop and Culture ETF (Listed Class)**

The index universe of the Index (the “Index Universe”) comprises of securities which:

- (A) satisfy the following eligibility criteria: (i) are listed on the Korea Exchange; (ii) are of companies headquartered in South Korea; and (iii) have an average daily trading value of at least HKD20 million over a period of 6 months prior to and including the Selection Day (as defined in the Prospectus); and
- (B) are of companies classified under any sub-industry of the following index categories which are considered as the most representative sectors relating to the global popularity of Korean culture (each an “Index Category”), based on their Level 6 (subindustry) classification under the FactSet Revere Business Industry Classification Systems Focus (“RBICS Focus”):

Index Category	Sub-Industry
Pop	Music
	General Entertainment and Programming
Contents	International TV Cable and Broadcast Networks
	Television Production
	Television, Film and Video
	Miscellaneous Marketing and Advertising Services
	Multimedia Design and Engineering Software
	Motion Picture and Television Production
	General Entertainment Content Providers and Sites
	Motion Picture Production
	General Electronics Distributors
	Sweets and Snacks Production
Food	General Food and Beverage Production
	Dry and Shelf-Stable Meals Production
	General Food Manufacturing and Processing
	General Consumer Content Providers
Internet	Web Portal Sites and Software
	Handheld and Smart Phone Games Software
Gaming	Online Game Websites and Software
	General Personal Care and Cleaning Products Makers
Beauty	

(collectively, the “Eligibility Criteria”).

Please refer to the relevant Appendix to the Prospectus for further information on RBICS Focus.

Securities which are included in the Index Universe are then selected as Index constituents on each Selection Day in accordance with the following rules and in the following sequence: (A) all securities are ranked based on their free float-adjusted market capitalisation in descending order; (B) the top 20 securities based on their free float-adjusted market capitalisation are selected as Index constituents; (C) existing Index constituents which rank 21st to 35th based on their free float-adjusted market capitalisation will be selected as Index constituents until the number of securities selected reaches 30; and (D) if less than 30 securities are selected as Index constituents after step (C) above, non-Index constituents which rank 21st to 35th based on their free float-adjusted market capitalisation will be selected as Index constituents until the number of securities selected reaches 30. If less than 30 securities pass the selection criteria described above, all such securities will be selected resulting in less than 30 Index constituents.

On each Selection Day, the constituents of the Index are assigned a weight as follows and are subject to the following caps (the “Index Category Caps”): (A) the Index constituents which are classified under the Index Categories of “Pop” and “Contents” (“Bucket I”) are assigned a weight of 50% in total, where each of such an Index constituent is (i) assigned a weight according to its free float-adjusted market capitalisation and (ii) subject to a 10% cap; and (B) the Index constituents which are classified under the Index Categories of “Food”, “Internet”, “Gaming” and “Beauty” (“Bucket II”) are assigned a weight of 50% in total, where each of such an Index constituent is (i) assigned a weight according to its free float-adjusted market capitalisation and (ii) subject to a 4% cap.

In order to reflect the new selection of the Index components determined on the Selection Day, the Index is adjusted on the Rebalance Day after close of business. The “Rebalance Day” is second Friday in January and July, however if such a day is not a trading day then the rebalance day will be the immediately following trading day.

The Index is compiled and published by Solactive AG (the “Index Provider”). The Manager (and each of its connected

persons) is independent of the Index Provider.

The Index is a net total return index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed.

The Index is denominated and quoted in KRW. The Index was launched on 11 December 2023 and had a base level of 1,000 on 13 January 2017.

As at 31 March 2026, the Index comprised 30 constituent securities with a total market capitalisation of approximately KRW160,876.90 billion.

The Index is distributed under the following identifier:

Bloomberg: SOLKRCLN Index

Reuters: .SOLKRCLN

The Index composition (including a list of the constituents of the Index and their respective weightings) and additional information of the Index can be found on <https://www.solactive.com/> (this website has not been reviewed or approved by the SFC).

Use of derivatives/ investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's Net Asset Value.

What are the key risks?

Investment involves risks. You may suffer substantial / total loss by investing in this Sub-Fund. Please refer to the Prospectus for details including the risk factors.

1. General investment risk

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Equity market risk

- The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political, geopolitical and economic conditions and issuer-specific factors.

3. New index risk

- The Index is a new index. The Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Index. The Sub-Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.

4. Concentration risk

- The Sub-Fund is subject to concentration risk as a result of tracking the performance of a single geographical region or country (South Korea). The Sub-Fund may likely be more volatile than a broad-based fund, such as a global equity fund, as it is more susceptible to fluctuations in value of the Index resulting from adverse conditions in South Korea. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the South Korean market.
- Furthermore, the Sub-Fund's investments are concentrated in companies in various industries and sectors including entertainment, communication services, internet, gaming, consumer staples, consumer discretionary as well as food. The business performance of these industries or sectors are subject to a wide range of risks including but not limited to fierce competition (both domestically and internationally), potential obsolescence of products and services due to technological advancement and the innovation of competitors, government regulations and interventions and/or shifts in consumer preferences and spending levels. Fluctuations in the business for companies in these industries or sectors will have an adverse impact on the Net Asset Value of the Sub-Fund.

5. Risks associated with small-capitalisation / mid-capitalisation companies

- The Sub-Fund may invest in small and/or mid-capitalisation companies. The stock of small-capitalisation and mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.

6. Currency risk

- Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of

**Global X Exchange Traded Funds Series OFC -
Global X K-pop and Culture ETF (Listed Class)**

the Sub-Fund. In addition, the base currency of the Sub-Fund is KRW but the trading currency of the Sub-Fund is in HKD. The Net Asset Value of the Sub-Fund and its performance may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

7. Securities lending transactions risks

- The borrower may fail to return the securities in a timely manner or at all. The Sub-Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
- As part of the securities lending transactions, the Sub-Fund must receive cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Sub-Fund.
- By undertaking securities lending transactions, the Sub-Fund is exposed to operational risks such as delay or failure of settlement. Such delays and failure may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.

8. Differences in dealing arrangements between Listed and Unlisted Classes of Shares risk

- Investors of Listed Class of Shares and Unlisted Classes of Shares are subject to different pricing and dealing arrangements. The Net Asset Value per Share of each of the Listed Class of Shares and Unlisted Classes of Shares may be different due to different fees and cost applicable to each class. The trading hours of the SEHK applicable to the Listed Class of Shares in the secondary market and the dealing deadlines in respect of the Unlisted Classes of Shares are also different.
- Shares of the Listed Class of Shares are traded on the stock exchange on an intraday basis at the prevailing market price (which may diverge from the corresponding Net Asset Value), while Shares of the Unlisted Classes of Shares are sold through intermediaries based on the dealing day-end Net Asset Value and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Listed Class of Shares may be at an advantage or disadvantage compared to investors of the Unlisted Classes of Shares.
- In a stressed market scenario, investors of the Unlisted Classes of Shares could redeem their Shares at Net Asset Value while investors of the Listed Class of Shares in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding Net Asset Value) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Shares could sell their Shares on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Shares could not do so in a timely manner until the end of the day.

9. Differences in cost mechanisms between Listed and Unlisted Classes of Shares risk

- Investors should note that different cost mechanisms apply to Listed Class of Shares and Unlisted Classes of Shares. For Listed Class of Shares, the transaction fee and duties and charges in respect of creation and redemption applications are paid by the participating dealers applying for or redeeming such Shares and/or the Manager. Investors of Listed Class of Shares in the secondary market will not bear such transaction fees and duties and charges (but for the avoidance of doubt, may bear other fees, such as SEHK trading fees).
- On the other hand, the subscription and redemption of Unlisted Classes of Shares may be subject to a subscription fee and redemption fee, respectively, which will be payable to the Manager by the investor subscribing or redeeming. In addition, in order to protect the interests of all Shareholders of Unlisted Classes of Shares, in the event of substantial net subscriptions or net redemptions of an Unlisted Class of Shares of the Sub-Fund and/or exceptional market circumstances, in addition to the Subscription Price and/or Redemption Price, the Manager may (in its absolute discretion and taking into account the best interests of the Shareholders) impose a fiscal charge to account for the impact of the related costs.
- Any or all of these factors may lead to a difference in the Net Asset Value of the Listed Class of Shares and the Unlisted Classes of Shares.

10. Passive investment risk

- The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the Index are expected to result in corresponding falls in the value of the Sub-Fund.

11. Tracking error risk

- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

12. Trading risks

- The trading price of the Shares on the SEHK is driven by market factors such as the demand and supply of the

**Global X Exchange Traded Funds Series OFC -
Global X K-pop and Culture ETF (Listed Class)**

Shares. Therefore, the Shares may trade at a substantial premium or discount to the Sub-Fund's Net Asset Value.

- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Shares on the SEHK, investors may pay more than the Net Asset Value per Share when buying Shares on the SEHK, and may receive less than the Net Asset Value per Share when selling Shares on the SEHK.

13. Trading differences risks

- As the relevant stock exchanges on which the Index constituents are listed may be open when the Shares in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Shares.
- Differences in trading hours between the relevant stock exchanges and the SEHK may also increase the level of premium or discount of the Share price to its Net Asset Value.
- Shares listed on certain stock exchanges are subject to trading bands which restrict increase and decrease in the trading price. Shares listed on the SEHK are not. This difference may also increase the level of premium or discount of the Share price to its Net Asset Value.

14. Termination risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the Net Asset Value of the Sub-Fund is less than HK\$50,000,000 (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

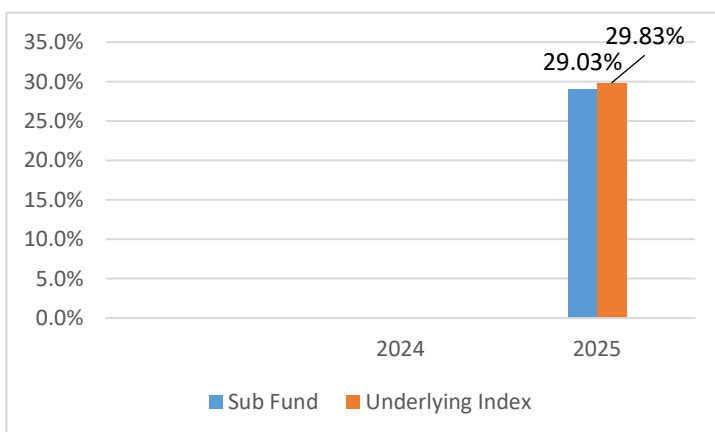

15. Reliance on market maker risk

- Although the Manager will use its best endeavours to put in place arrangements so that at least one Market Maker will maintain a market for the Shares, and that at least one Market Maker gives not less than three months' notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for Shares may be adversely affected if there is no or only one Market Maker for the Shares. There is also no guarantee that any market making activity will be effective.

16. Distributions paid out of capital / effectively out of capital risk

- Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Sub-Fund and will reduce the capital available for future investment.

How has the Sub-Fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, Net Asset Value to Net Asset Value.
- These figures show by how much the Sub-Fund increased or decreased in value during the calendar year shown. Performance data has been calculated in HKD including ongoing charges and excluding trading costs on SEHK you might have to pay.
- Where no past performance is shown, there was insufficient data available in that year to provide performance.
- Sub-Fund launch date: 19 March 2024

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the Sub-Fund on SEHK

Fee	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% ¹ of the trading price
Accounting and Financial Reporting Council (“AFRC”) transaction levy	0.00015% ² of the trading price
Trading fee	0.00565% ³ of the trading price
Stamp duty	Nil

¹ Transaction levy of 0.0027% of the trading price of the Shares, payable by each of the buyer and the seller.

² AFRC transaction levy of 0.00015% of the trading price of the Shares, payable by each of the buyer and the seller.

³ Trading fee of 0.00565% of the trading price of the Shares, payable by each of the buyer and the seller.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the Net Asset Value of the Sub-Fund which may affect the trading price.

	Annual rate (as a % of the Sub-Fund’s Net Asset Value)
Management fee *	Currently 0.68% per annum
Custodian fee	Included in the Single Management Fee (as defined below)
Performance fee	Not applicable
Administration fee	Not applicable
Sub-Custodian fee	Included in the Single Management Fee
Registrar fee	Included in the Single Management Fee

* *The management fee is a single flat fee, payable out of the assets of the Sub-Fund, to cover all of the fees, costs and expenses associated with the Sub-Fund (and its due proportion of any costs and expenses of the Company allocated to it) (the “Single Management Fee”). As the Single Management Fee is a single fixed rate, the ongoing charges figure of the Sub-Fund will be equal to the Single Management Fee. Any costs, fees and expenses associated with the Sub-Fund exceeding the Single Management Fee shall be borne by the Manager and shall not be charged to the Sub-Fund. For the avoidance of doubt, the Single Management Fee does not include (to the extent not included in the operational fees as set out in the Prospectus) brokerage and transaction costs such as the fees and charges relating to the investment and realisation of investments of the Sub-Fund and extraordinary items such as litigation expenses.*

Please note the Single Management Fee may be increased up to a permitted maximum level by providing one month’s prior notice to Shareholders. Please refer to the section headed “Fees and Expenses” of the Prospectus for details.

Other fees

You may have to pay other fees when dealing in the Shares of the Sub-Fund. Please refer to the Prospectus for details.

Additional information

You can find the following information relating to the Sub-Fund (in English and Chinese) at the following website at <https://www.globalxetfs.com.hk/> (which has not been reviewed or approved by the SFC):

**Global X Exchange Traded Funds Series OFC -
Global X K-pop and Culture ETF (Listed Class)**

- The Prospectus including this Product Key Facts Statement (as revised from time to time)
- The latest annual financial reports and interim half yearly unaudited financial reports (in English only)
- Any notices relating to material changes to the Sub-Fund which may have an impact on its investors such as material alterations or additions to the Prospectus (including this Product Key Facts Statement) or the constitutive documents of the Company and/or the Sub-Fund
- Any public announcements made by the Manager in respect of the Sub-Fund, including information with regard to the Sub-Fund and the Index, the suspension of the creations and redemptions of Shares, the suspension of the calculation of the Net Asset Value, the changes in fees and the suspension and resumption of trading in its Shares
- The near real time indicative Net Asset Value per Share of the Sub-Fund in HKD only (updated every 15 second throughout each dealing day)
- The last Net Asset Value of the Sub-Fund in KRW only and the last Net Asset Value per Share of the Sub-Fund in KRW and HKD (updated on a daily basis on each Dealing Day)
- The past performance information of both the Listed Class of Shares and Unlisted Classes of Shares of the Sub-Fund
- The ongoing charges of both the Listed Class of Shares and Unlisted Classes of Shares of the Sub-Fund
- The annual tracking difference and tracking error of the Sub-Fund
- The full portfolio information of the Sub-Fund (updated on a daily basis)
- The latest list of the Participating Dealers and Market Makers for the Sub-Fund
- The composition of distributions (i.e. the relative amounts paid out of (i) net distributable income, and (ii) capital), if any, for a 12-month rolling period
- The proxy voting policy of the Manager

The near real time indicative Net Asset Value per Share in HKD referred to above is indicative and for reference only. This is updated every 15 seconds during SEHK trading hours and is calculated by ICE Data Services. The near real time indicative Net Asset Value per Share in HKD is calculated by ICE Data Services using the near real time indicative Net Asset Value per Share in KRW multiplied by a real time HKD:KRW foreign exchange rate provided by ICE Data Services Real-Time FX Rate. Since the indicative Net Asset Value per Share in KRW will not be updated when the underlying share market(s) are closed, the change to the indicative Net Asset Value per Share in HKD (if any) during such period is solely due to the change in the foreign exchange rate.

The last Net Asset Value per Share in HKD is indicative, is for reference only and is calculated using the last Net Asset Value per Share in KRW multiplied by the HKD:KRW exchange rate quoted by Thomson Reuters at 4:00pm (London Time) as of the same Dealing Day provided by the Custodian. The official last Net Asset Value per Share in KRW and the indicative last Net Asset Value per Share in HKD will not be updated when the underlying share market(s) are closed. Please refer to the Prospectus for details.

Important

If you are in doubt, you should seek professional advice.

The SFC takes no responsibility for the contents of this statement and makes no representation as to its accuracy or completeness.

The Company has been registered with the SFC as an open-ended fund company. The Company and the Sub-Fund have been authorised as collective investment schemes by the SFC. SFC registration and authorisation do not represent a recommendation or endorsement of the Company or the Sub-Fund nor do they guarantee the commercial merits of the Company, the Sub-Fund or their performance.
