\* As the Unlisted Classes of Shares (as defined below) of the Sub-Fund (as defined below) are newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value (as defined below) of the relevant class of the Sub-Fund over the same period. It may be different upon actual operation of the Sub-Fund and may vary from year to year and is capped at 0.88% for Class E Shares, 0.60% for Class F Shares, 1.20% for Class R1 Shares and 1.50% for Class R2 Shares of the average net asset value of the respective classes. Any ongoing expenses of the Sub-Fund will be borne by the Manager and will not be charged to respective classes if such expense would result in the ongoing charges figure exceeding 0.88% for Class E Shares, 0.60% for Class F Shares, 1.20% for Class R1 Shares and 1.50% for Class R2 Shares. Please refer to "Ongoing fees payable by the Sub-Fund" below and the Prospectus for details.

^ This is an estimated annual tracking difference. Investors should refer to the Sub-Fund's website for more up-to-date information on the actual tracking difference.

# This website has not been reviewed or approved by the Securities and Futures Commission (the "SFC").

### What is this product?

- Global X China Global Leaders ETF (the "Sub-Fund") is a sub-fund of the Global X Exchange Traded Funds Series OFC (the "Company"), which is a public umbrella open-ended fund company established under Hong Kong law with variable capital with limited liability and segregated liability between sub-funds.
- The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "Code").
- **The Sub-Fund offers both listed class of Shares (the "Listed Class of Shares") and unlisted classes of Shares (the "Unlisted Classes of Shares"). This statement contains information about the offering of the Unlisted Classes of Shares, and unless otherwise specified, references to "Shares" in this statement shall refer to the "Unlisted Classes of Shares". Investors should refer to a separate statement for the offering of the Listed Class of Shares.**

### Objective and investment strategy

#### Objective

The investment objective of the Sub-Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the FactSet China Global Leaders Index (the "Index").

#### Strategy

The Manager intends to adopt a combination of physical and synthetic replication strategy to achieve the investment objective of the Sub-Fund.

The Sub-Fund will:

- invest 50% to 100% of its net asset value ("Net Asset Value") directly in constituent stocks of the Index; and
- use synthetic replication strategy as an ancillary strategy when the Manager considers that such investments are beneficial to the Sub-Fund by investing up to 50% of its Net Asset Value in financial derivative instruments ("FDIs"), mainly funded total return swap transaction(s) with one or more swap counterparty(ies).

The Sub-Fund intends to obtain exposure to the constituent stocks of the Index (through direct investment and/or through FDIs) in substantially the same weightings in which they are included in the Index (the "Investment Strategy").

Where the adoption of the Investment Strategy is not efficient or practicable or where the Manager considers appropriate in its absolute discretion, the Manager may obtain exposure to representative sample of the constituent securities of the Index selected by the Manager (through direct investment and/or through FDIs) using rule-based quantitative analytical models to derive a portfolio sample. The Manager may cause the Sub-Fund to deviate from the Index weighting on the condition that the maximum deviation from the Index weighting of any constituent will not exceed 3 percentage points above or below such weighting.

Investors should note that the Manager may switch between the abovementioned strategies without prior notice to investors, in its absolute discretion as often as it believes appropriate in order to achieve the investment objective of the

Sub-Fund by tracking the Index as closely (or efficiently) as possible for the benefit of investors.

The Sub-Fund may invest in securities included in the Index that are issued by companies which are either headquartered or incorporated in Mainland China, Hong Kong or Macau, and are listed on one of the following stock exchanges: The Stock Exchange of Hong Kong Limited (the "SEHK"), the Shanghai Stock Exchange (the "SSE"), the Shenzhen Stock Exchange (the "SZSE"), the New York Stock Exchange (the "NYSE") and NASDAQ. The Sub-Fund will invest in A-Shares included in the Index through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect (collectively the "Stock Connect"), which may include stocks on the ChiNext Board of the SZSE and/or the Science and Technology Innovation Board (the "STAR Board") of the SSE. The Sub-Fund may also invest in foreign listings such as American Depositary Receipts ("ADRs") which are eligible for inclusion in the Index.

When adopting a synthetic replication strategy, the Sub-Fund will pass on the relevant portion of cash to the swap counterparty(ies) for each swap contract entered into and in return the swap counterparty(ies) will provide the Sub-Fund with an exposure to the economic gain/loss in the performance of the relevant constituent stocks of the Index (net of indirect costs). The Sub-Fund will bear the swap fees, which is a one-off variable fee consisting of commission and transaction costs payable to the swap counterparty each time the Sub-Fund enters into a swap transaction. The swap fees are charged based on the notional value of the swap transaction and may vary between different swap transactions. No fees are payable for the unwinding or early termination of swaps. The swap fees will be borne by the Sub-Fund and hence may have an adverse impact on the Net Asset Value and the performance of the Sub-Fund, and may result in higher tracking difference. The swap fees, if any, will be disclosed in the interim and annual financial reports of the Sub-Fund.

### **Other investments**

Other than swaps, the Manager may also invest no more than 10% of the Sub-Fund's Net Asset Value in futures for investment and hedging purposes, where the Manager believes such investments will help the Sub-Fund achieve its investment objective and are beneficial to the Sub-Fund. The futures in which the Sub-Fund may invest will be index futures which exhibit high correlation with the Index in order to manage the Sub-Fund's exposure to the Index constituents.

Currently, the Sub-Fund will not enter into sale and repurchase transactions, reverse repurchase transactions or other similar over-the-counter transactions. The Manager will seek the prior approval of the SFC (if required), and provide at least one month's prior notice to Shareholders before the Manager engages in any such investments.

The Manager may, on behalf of the Sub-Fund, enter into securities lending transactions with a maximum level of up to 50% and expected level of approximately 20% of its Net Asset Value and is able to recall the securities lent out at any time.

As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the value of the securities lent (interests, dividends and other eventual rights included) valued on a daily basis. The collateral will be subject to safekeeping by the Custodian or an agent appointed by the Custodian. Non-cash collateral received may not be sold, re-invested or pledged. Any re-investment of cash collateral received shall be subject to the requirements as set out in the Code. To the extent the Sub-Fund undertakes securities lending transactions, all revenues (net of direct and indirect expenses as reasonable and normal compensation for the services rendered by the Manager, a securities lending agent and/or other service providers in the context of such transactions to the extent permitted by applicable legal and regulatory requirements) shall be returned to the Sub-Fund.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Part 1 of the Prospectus.

### **Index**

The Index is a free float market capitalisation weighted index and an equity benchmark designed to track the performance of securities that are issued by "Chinese companies" identified as "Global Leaders".

"Chinese companies" refer to companies either headquartered or incorporated in Mainland China, Hong Kong or Macau. "Global Leaders" refer to companies which have shown that they are able to maintain a global presence and a demonstrable track record as globally competitive players within their respective industry sectors. Such companies must (i) derive a sizable proportion (being more than 25%) of the company's total sales from revenue generated outside of Mainland China, Hong Kong and Macau or generate greater than 1 billion USD in absolute revenue outside of Mainland China, Hong Kong and Macau and (ii) maintain a notable global customer relationship network determined with reference to an overseas customer relationship ratio as further explained below.

The Index universe comprises of securities (namely, common stocks and ADRs) which are issued by companies (i) either headquartered or incorporated in Mainland China, Hong Kong or Macau, (ii) listed on one of the following stock exchanges: the SEHK, SSE, SZSE, NYSE and NASDAQ\* and (iii) having a minimum three-month average daily trading value of HKD20 million on each selection day of the Index.

\* If company has multiple share class in Hong Kong Stock Exchange and Mainland China Exchanges, the Hong Kong Stock Exchange listing is selected. Securities whose headquarter or country of incorporation are in offshore financial

centers (OFCs) including the Cayman Islands, British Virgin Islands (BVI), Bermuda, and Ireland and are listed in Hong Kong, Shanghai and Shenzhen (those listed in Shanghai and Shenzhen are those participating in the Shanghai Stock Connect, and Shenzhen Stock Connect schemes only) are also eligible.

Eligible securities are then categorised in accordance with FactSet Revere Business Industry Classification Systems with Revenue ("RBICS with Revenue") at their "level 4" industry group level (each a "Category"). RBICS with Revenue normalises non-standardised business segment reports by mapping companies' segment revenues to the granular sectors of FactSet Revere Business Industry Classification System, a proprietary industry classification matrix used by FactSet Research Systems Inc. ("FactSet" or the "Index Provider"). The securities within each Category are then ranked in descending order based on revenue derived from that specific Category.

The selected securities must be issued by companies which (i) have the highest and second highest revenue derived from each Category, (ii) generate more than 25% of their revenue from operations based outside of Mainland China, Hong Kong and Macau or generate greater than 1 billion USD in absolute revenue outside of Mainland China, Hong Kong and Macau and (iii) has an overseas customer relationship ratio greater than 50% or overseas customer relationship ratio greater than 20% and top 1 in RBICS Level 4.

The overseas customer relationship ratio will be calculated based on the following formula:

$$\text{overseas customer relationship ratio} = \frac{\text{number of "Overseas Customer Relationships" } ^{\wedge}}{\text{total number of customer relationships maintained by the issuer}}$$

<sup>^</sup> "Overseas Customer Relationship" is defined as corporate or non-corporate entity which is headquartered outside of Mainland China, Hong Kong and Macau.

30 securities shall be selected on each selection day of the Index. If the number of securities is less than 30, the eligibility requirements of the Index constituents will be revised following consultation with the Index Provider's index oversight committee to expand the pool of eligible securities, and prior notice will be given to Shareholders where required by the applicable regulations. Please refer to the Prospectus for further details.

The Index methodology was developed by FactSet and the Index was launched on 4 March 2021. The Manager (and each of its Connected Persons) is independent of the Index Provider. Solactive AG (the "Index Calculation Agent") is responsible for the operation, calculation, maintenance and record keeping in respect of the Index.

The Index is a net total return index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. The Index is denominated and quoted in RMB.

As at 31 March 2025, it comprised 30 constituent stocks with total market capitalisation of approximately RMB12,383.96 billion.

Details of the index methodology of the Index can be found on <https://www.factset.com/company/resource-library?topic=Index%2BSolutions> (this website has not been reviewed or approved by the SFC). The Index composition (including a list of the constituents of the Index and their respective weightings) can be found on <https://www.factset.com/company/resource-library?topic=Index%2BSolutions> (this website has not been reviewed or approved by the SFC).

The Index is distributed under the following identifier:

Bloomberg: FDSCGLN

### Use of derivatives/ investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's Net Asset Value.

### What are the key risks?

**Investment involves risks. You may suffer substantial / total loss by investing in this Sub-Fund. Please refer to the Prospectus for details including the risk factors.**

#### 1. General investment risk

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

#### 2. Equity market risk

- The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political, geopolitical and economic

conditions and issuer-specific factors.

**3. Risk associated with small-capitalisation and mid-capitalisation companies**

- The Sub-Fund may invest in small and/or mid-sized companies. The stock of small-capitalisation and mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.

**4. Concentration risk**

- The Sub-Fund's investments are concentrated in companies which are either headquartered or incorporated in Mainland China, Hong Kong or Macau. The Sub-Fund's value may be more volatile than that of a fund with a more diverse portfolio.
- The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting Mainland China, Hong Kong and Macau market.

**5. Currency risk**

- Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund. In addition, the base currency of the Sub-Fund is RMB but the class currencies of the Sub-Fund are in HKD, RMB and USD. The Net Asset Value of the Sub-Fund and its performance may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

**6. Risks associated with investments in FDIs**

- The Sub-Fund's synthetic replication strategy will involve investing up to 50% of its Net Asset Value in FDIs, mainly funded total return swap transaction(s) through one or more counterparty(ies). Other than swaps, the Sub-Fund may also invest in other FDIs for investment and hedging purposes. As such, the Sub-Fund may suffer significant loss if a counterparty fails to perform its obligations, or in case of insolvency or default of the counterparty(ies).
- Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. FDIs are susceptible to price fluctuations and higher volatility, and may have large bid and offer spreads and no active secondary markets. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the Sub-Fund. Exposure to FDIs may lead to a high risk of significant loss by the Sub-Fund.

**7. Mainland China related risks**

- Mainland China is an emerging market. The Sub-Fund invests in Chinese companies which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks / control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- The A-Share market in Mainland China is highly volatile and may be subject to potential settlement difficulties. Prices of A-Shares may rise and fall significantly and may fluctuate to a greater degree than more developed markets. Such volatility may result in suspension of A-Shares or imposition of other measures by Mainland China authorities affecting the dealing/trading of Shares, disrupting the creation and redemption of Shares, and adversely affecting the value of the Sub-Fund. A Participating Dealer is also unlikely to create or redeem Shares if it considers that A-Shares may not be available.
- Securities exchanges in Mainland China markets typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.

**8. RMB currency and conversion risks**

- RMB is currently not freely convertible and is subject to exchange controls and restrictions.
- Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against other currencies will not depreciate. Any depreciation of RMB could adversely affect the value of investor's investment in the Sub-Fund.
- Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Under exceptional circumstances, payment of redemptions and/or distribution payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

**9. Stock Connect risks**

- The relevant regulations and rules on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

**10. ChiNext market and/or STAR Board risks**

- *Higher fluctuation on stock prices and liquidity risk* – Listed companies on the ChiNext market and/or STAR Board are usually of emerging nature with smaller operating scale. In particular, listed companies on ChiNext

market and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the Main Board of the SZSE and the SSE (collectively, the “Main Boards”).

- *Over-valuation risk* – Stocks listed on the ChiNext market and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- *Differences in regulation* – The rules and regulations regarding companies listed on ChiNext market and STAR Board are less stringent in terms of profitability and share capital than those on the Main Boards.
- *Delisting risk* – It may be more common and faster for companies listed on the ChiNext market and/or STAR Board to delist. In particular, ChiNext market and STAR Board have stricter criteria for delisting compared to other boards. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.
- *Concentration risk* – STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the Sub-Fund to higher concentration risk.

Investments in the ChiNext market and/or STAR Board may result in significant losses for the Sub-Fund and its investors.

#### **11. Risks associated with ADRs**

- Exposure to ADRs may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks held by the depositary bank from the bank's own assets and liquidity risks (as ADRs are often less liquid than the underlying stock). Bankruptcy events in respect of the depositary banks may lead to trading suspension and thereafter a freeze of the price of the ADRs affected, which may negatively affect the performance and/or liquidity of the Sub-Fund. Also, holders of ADRs generally do not have the same right as the direct shareholders of the underlying stocks. The performance of ADRs may also be impacted by the related fees.
- In addition, there is a risk that the ADRs of Mainland Chinese companies may be delisted as a result of regulatory actions by the local government and/or stock exchange. In such an event, the value of such ADRs may be adversely affected as such ADRs could become difficult to trade and to value, and certain investors may not be allowed to invest in such ADRs. This may in turn have an adverse impact on the Net Asset Value of the Sub-Fund.

#### **12. Risk of reliance on the Index Calculation Agent**

- The Index Provider relies on the Index Calculation Agent to calculate and maintain the Index and to provide continuous support in terms of index expertise. If the Index Calculation Agent ceases to provide such support to the Index Provider or to act as index calculation agent of the Index, the Index Provider may not be able to immediately find a successor index calculation agent with the requisite expertise or resources and any new appointment may not be on equivalent terms or of similar quality, and this may negatively affect the Sub-Fund. This risk is however minimised as the Index Provider has a list of candidates who are eligible to take up the role of index calculation agent of the Index.

#### **13. Mainland China tax risk**

- There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realised via Stock Connect on the Sub-Fund's investments in Mainland China (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund will not make any withholding corporate income tax provision on the gross realised or unrealised capital gains derived from the trading of A-Shares via Stock Connect.
- If actual tax is collected by the State Taxation Administration of the PRC and the Sub-Fund is required to make payments reflecting tax liabilities for which no provision has been made, the Net Asset Value of the Sub-Fund may be adversely affected, as the Sub-Fund will ultimately have to bear the full amount of tax liabilities. In this case, the tax liabilities will only impact Shares in issue at the relevant time, and the then existing Shareholders and subsequent Shareholders will be disadvantaged as such Shareholders will bear, through the Sub-Fund, a disproportionately higher amount of tax liabilities as compared to that borne at the time of investment in the Sub-Fund.

#### **14. Securities lending transactions risk**

- The borrower may fail to return the securities in a timely manner or at all. The Sub-Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
- As part of the securities lending transactions, the Sub-Fund must receive cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Sub-Fund.

- By undertaking securities lending transactions, the Sub-Fund is exposed to operational risks such as delay or failure of settlement. Such delays and failure may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
- 15. Passive investment risk**
- The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the Index are expected to result in corresponding falls in the value of the Sub-Fund.
- 16. Differences in dealing arrangements between Listed and Unlisted Classes of Shares risk**
- Investors of Listed Class of Shares and Unlisted Classes of Shares are subject to different pricing and dealing arrangements. The Net Asset Value per Share of each of the Listed Class of Shares and Unlisted Classes of Shares may be different due to different fees and cost applicable to each class. The trading hours of the SEHK applicable to the Listed Class of Shares in the secondary market and the dealing deadlines in respect of the Unlisted Classes of Shares are also different.
  - Shares of the Listed Class of Shares are traded on the stock exchange on an intraday basis at the prevailing market price (which may diverge from the corresponding Net Asset Value), while Shares of the Unlisted Classes of Shares are sold through intermediaries based on the dealing day-end Net Asset Value and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Listed Class of Shares may be at an advantage or disadvantage compared to investors of the Unlisted Classes of Shares.
  - In a stressed market scenario, investors of the Unlisted Classes of Shares could redeem their Shares at Net Asset Value while investors of the Listed Class of Shares in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding Net Asset Value) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Shares could sell their Shares on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Shares could not do so in a timely manner until the end of the day.
- 17. Differences in cost mechanisms between Listed and Unlisted Classes of Shares risk**
- Investors should note that different cost mechanisms apply to Listed Class of Shares and Unlisted Classes of Shares. For Listed Class of Shares, the transaction fee and duties and charges in respect of creation and redemption applications are paid by the participating dealers applying for or redeeming such Shares and/or the Manager. Investors of Listed Class of Shares in the secondary market will not bear such transaction fees and duties and charges (but for the avoidance of doubt, may bear other fees, such as SEHK trading fees).
  - On the other hand, the subscription and redemption of Unlisted Classes of Shares may be subject to a subscription fee and redemption fee, respectively, which will be payable to the Manager by the investor subscribing or redeeming. In addition, in order to protect the interests of all Shareholders of Unlisted Classes of Shares, in the event of substantial net subscriptions or net redemptions of an Unlisted Class of Shares of the Sub-Fund and/or exceptional market circumstances, in addition to the Subscription Price and/or Redemption Price, the Manager may (in its absolute discretion and taking into account the best interests of the Shareholders) impose a fiscal charge to account for the impact of the related costs.
  - Any or all of these factors may lead to a difference in the Net Asset Value of the Listed Class of Shares and the Unlisted Classes of Shares.
- 18. Tracking error risk**
- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.
- 19. Termination risk**
- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the Net Asset Value of the Sub-Fund is less than HK\$50,000,000 (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.
- 20. Distributions paid out of capital / effectively out of capital risk**
- Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Sub-Fund and will reduce the capital available for future investment.

### How has the Sub-Fund performed?

Since the Sub-Fund is newly set up, there is insufficient data available to provide a useful indication of past performance to investors.

<b>Is there any guarantee?</b>
The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

## What are the fees and charges?

### Charges which may be payable by you

Fee	What you pay
<b>Subscription fee<sup>#</sup></b>	Up to 3% of the subscription amount
<b>Redemption fee<sup>#</sup></b>	Nil
<b>Switching fee<sup>#^</sup></b>	Nil, except where a Shareholder has already made 4 conversions in the last 12-month period, such Shareholder may be charged a total switching fee of up to 1% of the Net Asset Value of the Shares converted for each additional conversion in that 12-month period

<sup>#</sup> Please note that some fees may be increased up to a permitted maximum amount by providing one month's prior notice to Shareholders. Please refer to the section headed "Fees and Expenses" of the Prospectus for further details on the permitted maximum of such fees allowed.

<sup>^</sup> Investors should note that switching between Unlisted Classes of Shares and Listed Class of Shares is not available. Switching between different classes of Unlisted Classes of Shares of the Sub-Fund may be permitted by the Manager.

### Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the Net Asset Value of the Sub-Fund which may affect the subscription/redemption price.

	Annual rate (as a % of the Sub-Fund's Net Asset Value)			
	Class E (HKD) Shares Class E (RMB) Shares Class E (USD) Shares	Class F (HKD) Shares Class F (RMB) Shares Class F (USD) Shares	Class R1 (HKD) Shares Class R1 (RMB) Shares Class R1 (USD) Shares	Class R2 (HKD) Shares Class R2 (RMB) Shares Class R2 (USD) Shares
<b>Management fee *</b>	0.58%	0.40%	0.90%	1.20%
<b>Custodian fee*</b>	Currently 0.0425% per annum for the first USD300 million of the Net Asset Value of the Sub-Fund, and at 0.0325% per annum for the remaining balance of the Net Asset Value of the Sub-Fund, subject to a monthly minimum of USD2,500.			
<b>Performance fee</b>	Not applicable			
<b>Administration fee</b>	Not applicable			
<b>Sub-Custodian fee</b>	Included in the custodian fee			

\* Please note that some fees may be increased up to a permitted maximum level by providing one month's prior notice to Shareholders. Please refer to the section headed "Fees and Expenses" of the Prospectus for details.

### Other fees

You may have to pay other fees when dealing in the Shares of the Sub-Fund. Please refer to the Prospectus for details.

### Additional information

You generally buy and redeem Shares at the Sub-Fund's next-determined Net Asset Value after the Custodian receives, directly or via a distributor, your request in good order on or before 11:00 a.m. (Hong Kong time), being the Sub-Fund's dealing cut-off time for the Unlisted Classes of Shares on each dealing day of the Sub-Fund. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal dealing cut-off time (which

may be earlier than the Sub-Fund's dealing cut-off time).

You can find the following information relating to the Sub-Fund (in English and Chinese) on the following website <https://www.globalxetfs.com.hk/> (which has not been reviewed or approved by the SFC):

- The Prospectus including this Product Key Facts Statement (as revised from time to time);
- The latest annual audited financial reports and interim half yearly unaudited financial reports (in English only);
- Any notices relating to material changes to the Sub-Fund which may have an impact on its investors such as material alterations or additions to the Prospectus (including this Products Key Facts Statement) or any of the constitutive documents of the Company and/or a Sub-Fund;
- Any public announcements made by the Manager in respect of the Sub-Fund, including information with regard to the Sub-Fund and the Index, the suspension of the creations and redemptions of Shares, the suspension of the calculation of its Net Asset Value, changes in its fees and the suspension and resumption of trading in its Shares;
- The last Net Asset Value of the Sub-Fund in RMB only and the last Net Asset Value per Share of the Sub-Fund in RMB and HKD (updated on a daily basis on each Dealing Day);
- The past performance information of both the Listed Class of Shares and Unlisted Classes of Shares of the Sub-Fund;
- The ongoing charges of both the Listed Class of Shares and Unlisted Classes of Shares of the Sub-Fund;
- The annual tracking difference and tracking error of the Sub-Fund;
- The full portfolio information of the Sub-Fund (updated on a daily basis);
- The composition of distributions (i.e. the relative amounts paid out of (i) net distributable income, and (ii) capital), if any, for a 12-month rolling period; and
- The proxy voting policy of the Manager.

The Net Asset Value of the Sub-Fund is calculated, and the latest subscription and redemption prices of the Unlisted Classes of Shares are available, each business day on the website <https://www.globalxetfs.com.hk/> (which has not been reviewed or approved by the SFC).

### **Important**

If you are in doubt, you should seek professional advice.

The SFC takes no responsibility for the contents of this statement and makes no representation as to its accuracy or completeness.

The Company has been registered with the SFC as an open-ended fund company. The Company and the Sub-Fund have been authorised as collective investment schemes by the SFC. SFC registration and authorisation do not represent a recommendation or endorsement of the Company or the Sub-Fund nor do they guarantee the commercial merits of the Company, the Sub-Fund or their performance. They do not mean the Company or the Sub-Fund is suitable for all investors nor do they represent an endorsement of their suitability for any particular investor or class of investors.
