

PRODUCT KEY FACTS

**Global X Exchange Traded Funds Series OFC -
Global X China Core TECH ETF (Listed Class)
30 June 2025**

Issuer: Mirae Asset Global Investments (Hong Kong) Limited

- **This is a passive exchange traded fund.**
- **This statement provides you with key information about this product.**
- **This statement is a part of the Prospectus.**
- **You should not invest in this product based on this statement alone.**

Quick facts

Stock code:	3448
Trade lot size:	1 Share
Manager:	Mirae Asset Global Investments (Hong Kong) Limited
Custodian:	Cititrust Limited
Administrator:	Citibank, N.A., Hong Kong Branch
Ongoing charges over a year*:	Estimated to be 0.68%
Estimated annual tracking difference^:	-2.00%
Underlying Index:	Mirae Asset China Tech Top 30 Index
Base currency:	Hong Kong dollar (HKD)
Trading currency:	Hong Kong dollar (HKD)
Financial year end of the Sub-Fund:	31 March
Distribution policy:	Annually (usually in May of each year) at the Manager's discretion. Distributions may be paid out of capital or effectively out of capital, but may not be so paid if the cost of the Sub-Fund's operations is higher than the return from management of the Sub-Fund's cash and holdings of investment products.
	Distributions on any Shares will be in HKD only.
ETF Website#:	https://www.globalxetfs.com.hk/

* As the Sub-Fund (as defined below) is newly set up, this figure is an estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average Net Asset Value (as defined below) of the Listed Class of Shares (as defined below) over the same period. It may be different upon actual operation of the Sub-Fund and may vary from year to year. As the Sub-Fund adopts a single management fee structure, the estimated ongoing charges of the Sub-Fund will be equal to the amount of the single management fee, which is capped at 0.68% of the average Net Asset Value of the Listed Class of Shares of the Sub-Fund. Any ongoing expenses exceeding 0.68% of the average Net Asset Value of the Listed Class of Shares of the Sub-Fund will be borne by the Manager and will not be charged to the Sub-Fund. Please refer to "Ongoing fees payable by the Sub-Fund" below and the Prospectus for details.

^ This is an estimated annual tracking difference. Investors should refer to the Sub-Fund's website for more up-to-date information on the actual tracking difference.

This website has not been reviewed or approved by the Securities and Futures Commission (the "SFC").

What is this product?

- Global X China Core TECH ETF (the "Sub-Fund") is a sub-fund of the Global X Exchange Traded Funds Series OFC (the "Company"), which is a public umbrella open-ended fund company established under Hong Kong law with variable capital with limited liability and segregated liability between sub-funds. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "Code").
- **The Sub-Fund offers both listed class of Shares (the "Listed Class of Shares") and unlisted classes of Shares (the "Unlisted Classes of Shares"). This statement contains information about the offering of the Listed Class of Shares, and unless otherwise specified, references to "Shares" in this statement shall refer to the "Listed**

Class of Shares". Investors should refer to a separate statement for the offering of the Unlisted Classes of Shares.

- The Listed Class of Shares of the Sub-Fund are listed on The Stock Exchange of Hong Kong Limited (the "SEHK") and are traded on the SEHK like listed stocks.

Objective and investment strategy

Objective

The investment objective of the Sub-Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the Mirae Asset China Tech Top 30 Index (the "Index").

Strategy

In seeking to achieve the Sub-Fund's investment objective, the Manager will primarily use a full replication strategy through investing directly in constituent stocks of the Index in substantially the same weightings in which they are included in the Index (the "Replication Strategy").

Where the adoption of the Replication Strategy is not efficient or practicable or where the Manager considers appropriate in its absolute discretion, the Manager may pursue a representative sampling strategy and hold a representative sample of the constituent securities of the Index selected by the Manager using rule-based quantitative analytical models to derive a portfolio sample (the "Representative Sampling Strategy"). In pursuing the Representative Sampling Strategy, the Manager may cause the Sub-Fund to deviate from the Index weighting on the condition that the maximum deviation from the Index weighting of any constituent will not exceed 3 percentage points above or below such weighting.

Investors should note that the Manager may switch between the Replication Strategy and the Representative Sampling Strategy without prior notice to investors, in its absolute discretion as often as it believes appropriate in order to achieve the investment objective of the Sub-Fund by tracking the Index as closely (or efficiently) as possible for the benefit of investors.

The Sub-Fund may invest in the following securities related to the People's Republic of China (the "PRC") including mainland China ("Mainland China"): A-Shares, B-Shares, H-Shares, P-Chips and Red Chips. The Sub-Fund will invest in A-Shares included in the Index through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect (collectively the "Stock Connect"), which may include stocks on the ChiNext Board of the Shenzhen Stock Exchange and/or the Science and Technology Innovation Board (the "STAR Board") of the Shanghai Stock Exchange.

The Manager may invest no more than 10% of the Sub-Fund's net asset value (the "Net Asset Value") in futures for investment and hedging purposes, where the Manager believes such investments will help the Sub-Fund achieve its investment objective and are beneficial to the Sub-Fund. The futures in which the Sub-Fund may invest will be index futures which exhibit high correlation with the Index in order to manage the Sub-Fund's exposure to the Index constituents.

The Sub-Fund may also invest no more than 10% of its Net Asset Value in cash and money market funds which are authorised under Chapter 8.2 of the Code or eligible schemes under Chapter 7.11A of the Code for cash management purpose.

Currently, the Sub-Fund will not enter into sale and repurchase transactions, reverse repurchase transactions or other similar over-the-counter transactions. The Manager will seek the prior approval of the SFC (if required), and provide at least one month's prior notice to Shareholders before the Manager engages in any such investments.

The Manager may, on behalf of the Sub-Fund, enter into securities lending transactions to a maximum level of up to 50% and expected level of approximately 20% of the Sub-Fund's Net Asset Value and is able to recall the securities lent out at any time.

As part of the securities lending transactions, the Sub-Fund must receive cash and/or non-cash collateral of at least 100% of the value of the securities lent (interests, dividends and other eventual rights included) valued on a daily basis. The collateral will be marked-to-market on a daily basis and will be subject to safekeeping by the Custodian or an agent appointed by the Custodian. Non-cash collateral received may not be sold, re-invested or pledged. Any re-investment of cash collateral received shall be subject to the requirements as set out in the Code. To the extent the Sub-Fund undertakes securities lending transactions, all revenues (net of direct and indirect expenses as reasonable and normal compensation for the services rendered by the Manager, a securities lending agent and/or other service providers in the context of such transactions to the extent permitted by applicable legal and regulatory requirements) shall be returned to the Sub-Fund.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in Part 1 of the Prospectus.

Index

**Global X Exchange Traded Funds Series OFC -
Global X China Core TECH ETF (Listed Class)**

The Index aims to track the performance of the largest technology companies in China and Hong Kong by market capitalisation, which are positioned to benefit from artificial intelligence, semiconductor, software, computer hardware, cloud, telecommunication equipment, autonomous and electric vehicles, robotics and industrial automation, healthcare technology, electric component and equipment, and technology enabled businesses.

Constituents must be (i) listed on a stock exchange in China (Shanghai Stock Exchange and Shenzhen Stock Exchange listed securities must be eligible for Northbound Trading under the Shanghai and Shenzhen Stock Connect programmes), Hong Kong or the United States including American Depositary Receipts (ADR), and (ii) domiciled in China or Hong Kong, failing which it must (x) be incorporated in one of the special interest countries as specified by the Index Provider (generally referring to a preferential incorporation owing to the tax benefits derived from the withholding tax structure of these countries; please refer to the Appendix of the Prospectus relating to the Sub-Fund for the full list of the special interest countries) and (y) listed in China or Hong Kong.

The Index is a net total return, market capitalisation weighted index. A net total return index seeks to replicate the overall return from holding a portfolio consisting of the Index constituents and in the calculation of the Index considers payments such as dividends after the deduction of any withholding tax or other amounts to which an investor holding the Index constituents would typically be exposed. The weight of a selected Index constituent will be determined based on its total market capitalization and subject to a single security cap of 10%. Additionally, the overall index weighting allocation will be divided between (i) Hong Kong-listed securities eligible under Stock Connect and (ii) other securities, at 65% and 35%, respectively. For the avoidance of doubt, such weighting allocation will not apply in circumstances where the composition of the Index constituents does not permit the specified allocation limits to be met.

The Index is compiled and managed by Mirae Asset Global Index Private Limited (the “Index Provider”). Each of the Manager and the Index Provider are presently subsidiaries of Mirae Asset Global Investments Co., Ltd. (the “Group”). The Index Provider ensures that the administration, calculation and maintenance of its indices are independent of any fund issuers (including those related to the Group). The functions which the Index Provider and the Manager will perform in connection with the Sub-Fund may give rise to potential conflicts of interest but the Manager will manage any such conflicts in the best interest of investors. For the avoidance of doubt, the Index Provider’s operations and the Manager’s investment management operations are under the responsibility of different staff and management teams.

The Index is denominated and quoted in HKD. The Index was launched on 27 September 2024 and had a base level of 1,000 on 28 March 2014. As at 30 May 2025, the Index comprised 30 constituent securities with a total market capitalisation of approximately HKD 8,286,177.61 million.

The Index is distributed under the following identifier:

Bloomberg: MACT30HN

Refinitiv RIC: .MACT30HN

The complete list of constituents of the Index, their respective weightings and additional details of the index methodology of the Index are published at <https://indices.miraeasset.com/> (this website has not been reviewed or approved by the SFC).

Use of derivatives/ investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s Net Asset Value.

What are the key risks?

Investment involves risks. You may suffer substantial / total loss by investing in this Sub-Fund. Please refer to the Prospectus for details including the risk factors.

1. General investment risk

- The Sub-Fund’s investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Equity market risk

- The Sub-Fund’s investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political, geopolitical and economic conditions and issuer-specific factors.

3. Concentration risk

- The Sub-Fund is subject to concentration risk as a result of tracking the performance of a single geographical region or country (i.e., China). The Sub-Fund may likely be more volatile than a broad-based fund, such as a global equity fund, as it is more susceptible to fluctuations in value of the Index resulting from adverse conditions in the region. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the China market.

4. Sector concentration risk

- The constituents of the Index, and accordingly the Sub-Fund's investments, may from time to time be concentrated in companies in a particular industry or sector such as electronic technology, technology services and retail trade. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant sector.

5. New index risk

- The Index is a new index. The Index has minimal operating history by which investors can evaluate its previous performance. There can be no assurance as to the performance of the Index. The Sub-Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.

6. Risks related to companies with a technology theme

- The Sub-Fund's investments are concentrated in companies with a technology theme. Many of the companies with a high business exposure to a technology theme have a relatively short operating history. Technology companies are often characterised by relatively higher volatility in price performance when compared to other economic sectors. Companies in the technology sector also face intense competition, and there may also be substantial government intervention, which may have an adverse effect on profit margins. Rapid changes could render obsolete the products and services offered by these companies. These companies are also subject to the risks of loss or impairment of intellectual property rights or licences, cyber security risks resulting in undesirable legal, financial, operational and reputational consequences.
- The Sub-Fund may be exposed to risks associated with different technology sectors and themes (including manufacturing, consumer discretionary, healthcare, financials, information technology, internet (including mobile), fintech, cloud, e-commerce, or digital). A downturn in the business for companies in these sectors or themes may have adverse effects on the Sub-Fund.

7. Stock Connect risks

- The relevant regulations and rules on Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations which may restrict the Sub-Fund's ability to invest in A-Shares through the programme on a timely basis. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in A-Shares or access Mainland China markets through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

8. ChiNext market and/or STAR Board risks

- *Higher fluctuation on stock prices and liquidity risk:* Listed companies on the ChiNext market and/or STAR Board are usually of emerging nature with smaller operating scale. In particular, listed companies on ChiNext market and/or STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the Main Board of the SZSE and the SSE (collectively, the "Main Boards").
- *Over-valuation risk:* Stocks listed on the ChiNext market and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- *Differences in regulation:* Rules and regulations regarding companies listed on ChiNext market and/or STAR Board are less stringent in terms of profitability and share capital than those on the Main Boards.
- *Delisting risk:* It may be more common and faster for companies listed on the ChiNext market and/or STAR Board to delist. In particular, ChiNext market and/or STAR Board have stricter criteria for delisting compared to other boards. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.
- *Concentration risk:* STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the Sub-Fund to higher concentration risk. Investments in the ChiNext market and/or STAR Board may result in significant losses for the Sub-Fund and its investors.

9. Risks associated with American Depositary Receipts

- Exposure to American Depositary Receipts may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks held by the depositary bank from the bank's own assets and liquidity risks (as depositary receipts are often less liquid than the underlying stocks). Bankruptcy events in respect of the depositary banks may lead to trading suspension and thereafter a freeze of the price of depositary receipts affected, which may negatively affect the performance and/or liquidity of the Sub-Fund. Also, holders of depositary receipts generally do not have the same right as the direct shareholders of the underlying stocks. The performance of the depositary receipts may also be impacted by the related fees.

10. Mainland China related risks

- The Sub-Fund may invest in companies domiciled in Mainland China or which derive their principal revenue from Mainland China. Mainland China is an emerging market. The Sub-Fund invests in Chinese companies which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risk, currency risks / control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- The A-Share market in Mainland China is highly volatile and may be subject to potential settlement difficulties. Prices of A-Shares may rise and fall significantly and may fluctuate to a greater degree than more developed markets. Such volatility may result in suspension of A-Shares or imposition of other measures by Mainland Chinese authorities affecting the dealing/trading of Shares, disrupting the creation and redemption of Shares, and adversely affecting the value of the Sub-Fund. A Participating Dealer is also unlikely to create or redeem Shares if it considers that A-Shares may not be available.
- Securities exchanges in Mainland China markets typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-Fund.

11. Tariff risk

- The Sub-Fund's investments in Chinese companies or those generating principal revenue from China may be subject to tariff risks. These tariffs may elevate operational costs and reduce the competitiveness of Chinese companies, potentially impacting their profitability and the Sub-Fund's performance. Additionally, the broader economic implications, such as supply chain disruptions and increased costs for consumers, may further affect the performance of the underlying investments of the Sub-Fund. Investors should consider these risks when evaluating their investment in the Sub-Fund.

12. Currency risk

- Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund. The Net Asset Value of the Sub-Fund and its performance may be affected unfavourably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

13. Securities lending transactions risks

- The borrower may fail to return the securities in a timely manner or at all. The Sub-Fund may as a result suffer from a loss or delay when recovering the securities lent out. This may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.
- As part of the securities lending transactions, the Sub-Fund must receive cash collateral of at least 100% of the valuation of the securities lent valued on a daily basis. However, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Sub-Fund.
- By undertaking securities lending transactions, the Sub-Fund is exposed to operational risks such as delay or failure of settlement. Such delays and failure may restrict the Sub-Fund's ability in meeting delivery or payment obligations from redemption requests.

14. Differences in dealing arrangements between Listed and Unlisted Classes of Shares risk

- Investors of Listed Class of Shares and Unlisted Classes of Shares are subject to different pricing and dealing arrangements. The Net Asset Value per Share of each of the Listed Class of Shares and Unlisted Classes of Shares may be different due to different fees and cost applicable to each class. The trading hours of the SEHK applicable to the Listed Class of Shares in the secondary market and the dealing deadlines in respect of the Unlisted Classes of Shares are also different.
- Shares of the Listed Class of Shares are traded on the stock exchange on an intraday basis at the prevailing market price (which may diverge from the corresponding Net Asset Value), while Shares of the Unlisted Classes of Shares are sold through intermediaries based on the dealing day-end Net Asset Value and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Listed Class of Shares may be at an advantage or disadvantage compared to investors of the Unlisted Classes of Shares.
- In a stressed market scenario, investors of the Unlisted Classes of Shares could redeem their Shares at Net Asset Value while investors of the Listed Class of Shares in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding Net Asset Value) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Shares could sell their Shares on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Shares could not do so in a timely manner until the end of the day.

15. Differences in cost mechanisms between Listed and Unlisted Classes of Shares risk

- Investors should note that different cost mechanisms apply to Listed Class of Shares and Unlisted Classes of Shares. For Listed Class of Shares, the transaction fee and duties and charges in respect of creation and redemption applications are paid by the participating dealers applying for or redeeming such Shares and/or the Manager. Investors of Listed Class of Shares in the secondary market will not bear such transaction fees and duties and charges (but for the avoidance of doubt, may bear other fees, such as SEHK trading fees).

- On the other hand, the subscription and redemption of Unlisted Classes of Shares may be subject to a subscription fee and redemption fee, respectively, which will be payable to the Manager by the investor subscribing or redeeming. In addition, in order to protect the interests of all Shareholders of Unlisted Classes of Shares, in the event of substantial net subscriptions or net redemptions of an Unlisted Class of Shares of the Sub-Fund and/or exceptional market circumstances, in addition to the Subscription Price and/or Redemption Price, the Manager may (in its absolute discretion and taking into account the best interests of the Shareholders) impose a fiscal charge to account for the impact of the related costs.
- Any or all of these factors may lead to a difference in the Net Asset Value of the Listed Class of Shares and the Unlisted Classes of Shares.

16. Mainland China tax risk

- There are risks and uncertainties associated with the current Mainland China tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Sub-Fund's investments in Mainland China (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund will not make any withholding corporate income tax provision on the gross realized or unrealized capital gains derived from the trading of A-Shares via Stock Connect.
- If actual tax is collected by the State Taxation Administration of the PRC and the Sub-Fund is required to make payments reflecting tax liabilities for which no provision has been made, the Net Asset Value of the Sub-Fund may be adversely affected, as the Sub-Fund will ultimately have to bear the full amount of tax liabilities. In this case, the tax liabilities will only impact Shares in issue at the relevant time, and the then existing Shareholders and subsequent Shareholders will be disadvantaged as such Shareholders will bear, through the Sub-Fund, a disproportionately higher amount of tax liabilities as compared to that borne at the time of investment in the Sub-Fund.

17. Passive investment risk

- The Sub-Fund is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund. Falls in the Index are expected to result in corresponding falls in the value of the Sub-Fund.

18. Tracking error risk

- The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

19. Trading risks

- The trading price of the Shares on the SEHK is driven by market factors such as the demand and supply of the Shares. Therefore, the Shares may trade at a substantial premium or discount to the Sub-Fund's Net Asset Value.
- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Shares on the SEHK, investors may pay more than the Net Asset Value per Share when buying Shares on the SEHK, and may receive less than the Net Asset Value per Share when selling Shares on the SEHK.

20. Trading differences risks

- As the relevant stock exchanges on which the Index constituents are listed may be open when the Shares in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund's Shares.
- Differences in trading hours between the relevant stock exchanges and the SEHK may also increase the level of premium or discount of the Share price to its Net Asset Value.
- Shares listed on certain stock exchanges are subject to trading bands which restrict increase and decrease in the trading price. Shares listed on the SEHK are not. This difference may also increase the level of premium or discount of the Share price to its Net Asset Value.

21. Termination risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the Net Asset Value of the Sub-Fund is less than HK\$50,000,000 (or its equivalent in the Sub-Fund's base currency). Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.

22. Reliance on market maker risk

- Although the Manager will use its best endeavours to put in place arrangements so that at least one Market Maker will maintain a market for the Shares, and that at least one Market Maker gives not less than three months' notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for Shares may be adversely affected if there is no or only one Market Maker for the Shares. There is also no guarantee that any market making activity will be effective.

23. Reliance of the same group risk

- Although being separate legal entities and operationally independent, each of the Manager and the Index Provider are presently subsidiaries of the Group. In the event of a financial catastrophe or the insolvency of any member of the Group, there may be adverse implications for the Group as a whole or other members of the Group which could affect the provision of services to the Sub-Fund. In such an event, the Net Asset Value of the Sub-Fund may be adversely affected and its operations disrupted.

24. Potential conflicts of interest risk

- The Manager and the Index Provider are all members of the Group. Although all transactions will be conducted at arm's length, conflicts of interest in respect of the Sub-Fund may arise from time to time amongst them. In particular, the Manager may be in dispute with the Index Provider if it terminates the licence to use the Index. The Manager will, having regard to its obligations to the Sub-Fund and the Shareholders, rigorously manage any such conflict in the best interest of investors. These may include ensuring there is no common director between the Manager and the Index Provider and independent management operations. Please also refer to the sub-section headed "Conflicts of Interest and Soft Dollars" under the section headed "Management of the Company and Sub-Funds" in the Prospectus for the measures and internal controls implemented by the Manager to manage such conflicts of interest.

25. Distributions paid out of capital / effectively out of capital risk

- Payments of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Share of the Sub-Fund and will reduce the capital available for future investment.

How has the Sub-Fund performed?

Since the Sub-Fund is newly set up, there is insufficient data available to provide a useful indication of past performance to investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the Sub-Fund on SEHK

Fee	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% ¹ of the trading price
Accounting and Financial Reporting Council ("AFRC") transaction levy	0.00015% ² of the trading price
Trading fee	0.00565% ³ of the trading price
Stamp duty	Nil

¹ Transaction levy of 0.0027% of the trading price of the Shares, payable by each of the buyer and the seller.

² AFRC transaction levy of 0.00015% of the trading price of the Shares, payable by each of the buyer and the seller.

³ Trading fee of 0.00565% of the trading price of the Shares, payable by each of the buyer and the seller.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the Net Asset Value of the Sub-Fund which may affect the trading price.

	Annual rate (as a % of the Sub-Fund's Net Asset Value)
Management fee *	Currently 0.68% per annum

**Global X Exchange Traded Funds Series OFC -
Global X China Core TECH ETF (Listed Class)**

Custodian fee	Included in the Single Management Fee (as defined below)
Performance fee	Not applicable
Administration fee	Not applicable
Sub-Custodian fee	Included in the Single Management Fee
Registrar fee	Included in the Single Management Fee

** The management fee is a single flat fee, payable out of the assets of the Sub-Fund, to cover all of the fees, costs and expenses associated with the Sub-Fund (and its due proportion of any costs and expenses of the Company allocated to it) (the "Single Management Fee"). As the Single Management Fee is a single fixed rate, the ongoing charges figure of the Sub-Fund will be equal to the Single Management Fee. Any costs, fees and expenses associated with the Sub-Fund exceeding the Single Management Fee shall be borne by the Manager and shall not be charged to the Sub-Fund. For the avoidance of doubt, the Single Management Fee does not include (to the extent not included in the operational fees as set out in the Prospectus) brokerage and transaction costs such as the fees and charges relating to the investment and realisation of investments of the Sub-Fund and extraordinary items such as litigation expenses.*

Please note the Single Management Fee may be increased up to a permitted maximum level by providing one month's prior notice to Shareholders. Please refer to the section headed "Fees and Expenses" of the Prospectus for details.

Other fees

You may have to pay other fees when dealing in the Shares of the Sub-Fund. Please refer to the Prospectus for details.

Additional information

You can find the following information relating to the Sub-Fund (in English and Chinese) at the following website at <https://www.globalxetfs.com.hk/> (which has not been reviewed or approved by the SFC):

- The Prospectus including this Product Key Facts Statement (as revised from time to time)
- The latest annual financial reports and interim half yearly unaudited financial reports (in English only)
- Any notices relating to material changes to the Sub-Fund which may have an impact on its investors such as material alterations or additions to the Prospectus (including this Product Key Facts Statement) or the constitutive documents of the Company and/or the Sub-Fund
- Any public announcements made by the Manager in respect of the Sub-Fund, including information with regard to the Sub-Fund and the Index, the suspension of the creations and redemptions of Shares, the suspension of the calculation of the Net Asset Value, the changes in fees and the suspension and resumption of trading in its Shares
- The near real time indicative Net Asset Value per Share of the Sub-Fund in HKD only (updated every 15 second throughout each dealing day)
- The last Net Asset Value of the Sub-Fund in HKD and the last Net Asset Value per Share of the Sub-Fund in HKD (updated on a daily basis on each Dealing Day)
- The past performance information of both the Listed Class of Shares and Unlisted Classes of Shares of the Sub-Fund
- The ongoing charges of both the Listed Class of Shares and Unlisted Classes of Shares of the Sub-Fund
- The annual tracking difference and tracking error of the Sub-Fund
- The full portfolio information of the Sub-Fund (updated on a daily basis)
- The latest list of the Participating Dealers and Market Makers for the Sub-Fund
- The composition of distributions (i.e. the relative amounts paid out of (i) net distributable income, and (ii) capital), if any, for a 12-month rolling period
- The proxy voting policy of the Manager
