- Unprecedented monetary and fiscal policy stimulus combo launched at end September substantially elevated market sentiments. Further policy (consumption, property, and capital market related) roll out and execution could support real economy recovery.

- Major internet platforms delivers solid earnings through cost optimization and quality-focused growth strategy. With the solid free cash flow generated by their core business, major internet platforms are proactively returning excess cash to investors through share repurchase and cash dividend.
- EV sales momentum remains strong in China, with EV penetration close to 50%. Improving Supply-demand dynamics in Battery sector will also support a recovery in capacity utilization rates.
