Announcement
Changes to the Underlying Index of the Sub-Fund

Dear Shareholders,

Mirae Asset Global Investments (Hong Kong) Limited, the Manager of the Company and the Sub-Fund (the "Manager"), wishes to inform investors of the following changes to the underlying index of the Sub-Fund, the FactSet China Robotics and Artificial Intelligence Index (the "Index").

1. Changes to the Index

With effect from 7 August 2026, the index methodology of the Index will be updated (the "Changes") by FactSet (the "Index Provider"). The principal Changes are summarised below:

Area of change	Current Index methodology	Revised Index methodology
1. Weighting and ranking basis	The Index is a **free float market capitalisation weighted** index. For selection, the shortlisted Securities are ranked in descending order by **free float adjusted market capitalisation**, and up to the top 25 Securities are selected. On each Selection Day, the selected Securities are weighted by **free float adjusted market capitalisation**, by dividing their individual float-adjusted market capitalisation by the sum of the float-adjusted market capitalisation of all Securities.	The Index is a **total market capitalisation weighted** index. For selection, the shortlisted Securities are ranked in descending order by **total market capitalisation**, and up to the top 25 Securities are selected. On each Selection Day, the selected Securities are weighted by **total market capitalisation**, by dividing their individual total market capitalisation by the sum of the total market capitalisation of all Securities.

[1] SFC authorisation is not a recommendation or endorsement of a scheme nor does it guarantee the commercial merits of a scheme or its performance. It does not mean the scheme is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

Area of change	Current Index methodology	Revised Index methodology
2. Reconstitution and rebalancing frequency	The Index is reconstituted and rebalanced **semi-annually**, after the close of trading on the fourth Friday in **March and September** each year (each a "Rebalancing Day"). The Selection Day is the close of trading on the second Friday in **March and September**.	The Index is reconstituted and rebalanced **quarterly**, after the close of trading on the fourth Friday in **March, June, September and December** each year (each a "Rebalancing Day"). The Selection Day is the close of trading on the second Friday in **March, June, September and December**.
3. Removal of the return on equity (ROE) screening	Securities with a last twelve months ("LTM") ROE of less than 0 are **capped at no more than 25%** of the total number of Index constituents (e.g. where the Index has 25 constituents, a maximum of **6** may have a negative ROE). If that proportion is exceeded, the Securities with the smallest free float adjusted market capitalisation are removed first and replaced by Securities with a positive LTM ROE and the largest free float adjusted market capitalisation which have not already been selected.	The ROE screening is **removed in its entirety**. There is **no longer any cap** on the number or proportion of Index constituents with a negative LTM ROE, and no ROE-based substitution of Securities.
4. Eligibility of China A-Shares which are not eligible for Stock Connect	Securities listed on the SSE and the SZSE are **eligible only where they participate in** the Shanghai Stock Connect and the Shenzhen Stock Connect schemes respectively. There is **no exception** to that requirement.	Securities primarily listed on the SSE (including the SSE STAR Market) and the SZSE (including the SZSE ChiNext Board) **remain eligible only where they are eligible for trading through Stock Connect**. However, **by way of exception, a Security which is not eligible for Stock Connect may qualify for inclusion** at a scheduled reconstitution, or pursuant to the Fast Entry Rule, provided that its **total market capitalisation is equal to or greater than the 50th percentile** total market capitalisation of the existing Index constituents as at the applicable Selection Day or, in the case of a Fast Entry review, the applicable eligibility assessment date.
5. Eligibility of Securities incorporated in offshore financial centres	Securities whose headquarters or country of incorporation are in offshore financial centres ("OFCs") including the Cayman Islands, the British Virgin Islands, Bermuda, Switzerland and Ireland are also eligible, **provided that they are listed in Hong Kong, or on the SSE or the SZSE through** the Shanghai Stock Connect or the Shenzhen Stock Connect schemes.	Securities whose headquarters or country of incorporation are in OFCs including the Cayman Islands, the British Virgin Islands, Bermuda, Switzerland and Ireland are also eligible. The additional requirement that such Securities be listed in Hong Kong, or on the SSE or SZSE through Stock Connect, is **removed**.
6. Weight caps and redistribution of excess weights	The weight of each Index constituent is **capped at 7.0%**, and excess weights are redistributed proportionally among the remaining uncapped constituents.	The weight of each Index constituent **continues to be capped at 7.0%**. In addition, the **aggregate weight of China A-Share constituents which are not eligible for Stock Connect is capped at 8.0%**. Any excess weights are redistributed proportionally among the remaining uncapped Securities.

Area of change	Current Index methodology	Revised Index methodology
7. Expansion of the Fast Entry Rule	**An initial public offering ("IPO") stock** may be eligible for fast-track addition to the Index between scheduled reconstitution or rebalance periods **five days after listing**, provided that it meets the minimum liquidity requirement and all other required selection criteria, and ranks above the 50th percentile by **free float adjusted market capitalisation** relative to the existing Index constituents.	**A stock** may be eligible for fast-track addition to the Index between scheduled reconstitution or rebalance periods **five trading days** after (i) **its listing date, in the case of an IPO**, or (ii) **its first inclusion in the list of Stock Connect eligible securities, in the case of an existing China A-Share stock**. In either case, the stock must meet the minimum liquidity requirement and all other required selection criteria, and have a **total market capitalisation** equal to or greater than the **50th percentile** total market capitalisation of the existing Index constituents as at the applicable eligibility assessment date.

Note: *Alongside the principal Changes set out above, the Index Provider has also taken this opportunity to implement certain other minor changes and miscellaneous technical updates to the Index methodology (the "Other Changes"), including: (i) an update to the description of the Index to refer to artificial intelligence software "and analytics"; (ii) the renaming of the relevant section of the Index methodology from "Corporate Actions – Spin-off" to "Corporate Actions – Spin-off and Fast Entry"; (iii) references to the eligible Mainland China listing venues being updated from the "Shanghai Stock Connect" and "Shenzhen Stock Connect" to the "Shanghai Stock Exchange" and the "Shenzhen Stock Exchange", with the Stock Connect eligibility requirement (and the exception referred to at item 4 above) set out in an explanatory footnote; (iv) where fewer than 15 Securities are selected, the list of RBICS Focus Level 6 sub-industries which may be expanded upon consultation with the Index Provider's index committee; (v) the re-ordering and renumbering of certain sections of the Index methodology; and (vi) editorial, typographical and other consequential updates. The Other Changes will not materially affect the investment objective, core investment characteristics or risk profile of the Sub-Fund.*

2. Impact on the Sub-Fund

There will be no change to the investment objective of the Sub-Fund, which will continue to seek to provide investment results that, before fees and expenses, closely correspond to the performance of the Index. The Sub-Fund will continue to adopt a passive investment strategy to track the Index.

Save as disclosed below, there will be no change to the fee level or cost in managing the Sub-Fund following the implementation of the Changes. There will be no impact on the operation and/or manner in which the Sub-Fund is being managed, and the Changes will not affect the existing investors of the Sub-Fund. Save as disclosed below, there will be no change to the features or risk profiles of the Sub-Fund. The investors' rights or interests will not be materially prejudiced as a result of the Changes set out in this Announcement.

The Changes described in this Announcement do not require investors' approval.

3. General

Unless otherwise stated, all capitalised terms in this Announcement shall have the same meaning as in the Prospectus of the Company (the "Prospectus") dated 16 July 2026.

The Prospectus will be updated to reflect the above Changes as well as consequential changes, editorial and miscellaneous updates. The updated Prospectus will be available on the Manager's website at https://www.globalxetfs.com.hk/[2] and the HKEX's website at www.hkex.com.hk on or around 7 August 2026.

Investors who have any enquiries regarding the above may contact the Manager, Mirae Asset Global Investments (Hong Kong) Limited, at Room 1101, 11/F, Lee Garden Three, 1 Sunning Road, Causeway Bay, Hong Kong or our enquiry hotline at (852) 2295-1500 during office hours.
